Student Compendium

‘Connecting students to industry, and industry to students.’

A collaboration of:

Major Funding Partners:

Compiled by

Emily Chambers

Compendium Project Officer, 2023 AUASA President, AIA-SA Committee Member.

And **School of Agriculture, Food & Wine, University of Adelaide** Interns (Undergraduate BAgSc)

James Easter, *Compendium Sponsorship Coordinator, 2022 AUASA President.*

Grace Moloney, *Compendium Communication and Socials Intern.*

Charlotte Poker, *Compendium Intern, 2023 AUASA 2nd Year Representative.*

Aleah Bakota, *Compendium Intern.*

Emma Knowles, *Compendium Intern.*

DATE: March 2023 (3rd Edition)

Special thanks for front cover design: Aleah Bakota, 2023 Student Compendium Intern.

Version control

Year	Edition	Lead	Interns
2021	1	Bruce Hancock	Emma Peters, James Easter
2022	2	Bruce Hancock, Emma Peters	James Easter, Shannon Manouge, Emily Chambers
2023	3	Bruce Hancock, Craig Davis	Emily Chambers, James Easter, Grace Moloney, Charlotte Poker, Aleah Bakota, Emma Knowles

The 2023 Student Compendium is for Agriculture, Animal and Agribusiness high school, vocational training and tertiary students. The compendium has been developed by the AIA (SA Division) in partnership with the Adelaide University Agricultural Students' Association (AUASA).

The original product was based on Bruce Hancock's networks and experience over many years of informally mentoring students and both National and International early career professionals.

In 2023, three University of Adelaide Interns, a Project Officer Intern, a Communications and Socials Intern and a Sponsorship Coordinator have reached out to organisations to again contribute. This 3rd edition ensures further evolution of this legacy document for the next generation of agriculturalists embarking on their careers in exciting industries and organisations.

Should readers find editing and or other opportunities that could be profiled in this Student Compendium, please favour details to the AIA-SA Division for their consideration.

Ag Institute Australia

Mentoring program

Why does the AIA have a mentoring program?

- Connect experienced members with early career members
- Facilitate knowledge transfer
- Support career progression at all levels of membership
- Provide better membership value for all members
- Earn up to 15 CPD points (5 points for 4 month mentoring program +10 points for the associated ethics masterclass)

What makes a good mentor/mentee?

- Desirable qualities
- Personable
- Reliable
- Caring
- Tolerant
- Committed

Mentoring Team

- Elizabeth Read
- Sarah Hunter
- Kimi Pellosis
- Scott McKinnon
- If you are interested in helping to run the mentoring program please let our team know

Requirements

- AIA current membership
- Attend an introductory training session and an AIA Ethics Masterclass (not required for those with CAg)
- Adherence to AIA code of ethics
- Awareness of grievance process

<https://www.aginstitute.com.au/pd-events/mentoring/>

Overview

The SA Division of the Agricultural Institute of Australia (AIA), in partnership with the Adelaide University Agricultural Students' Association (AUASA) have a keen focus on supporting the development of students and early career professionals' in having an enjoyable, productive and rewarding educational experience, while laying a solid career foundation.

The 2023 Student Compendium is an initiative to collate the breadth of opportunities for students studying primary industries and natural resource management. It aims to assist the next generation of vocational education, training and tertiary students plus secondary school teachers, careers advisers (and their students) discover opportunities such as careers, scholarships, graduate programs and training in the primary industries sector.

The Student Compendium was created to address the 'Capacity Building' pillars of the South Australian Agricultural Industry Blueprints. The initiative aims to foster passion for South Australian agriculture in the next generation of leaders by promoting further learning and development. It champions a collaborative approach to highlight the opportunities available in agriculture, to build a strong and capable future primary industries workforce. The resource emphasises the supportive nature of the South Australian agricultural industry and the commitment to ensuring its prosperity.

Students are encouraged to use the 2023 Student Compendium as a 'one-stop-shop' to assist their professional development by sourcing opportunities that align with their interests and goals. The Compendium assists students by providing many benefits to their career journey, such as;

- Participating in work experience
- Adding experience to resume
- Developing practical and professional skills
- Building a professional network
- Exploring new sectors and career pathways
- Providing a conversational point for interviews
- Travel experiences
- Further education and training
- Opportunities for financial support
- Facilitating research or project ideas
- Gaining acknowledgment for achievements
- Attending industry and networking events

The Student Compendium also has an important role amongst professionals and businesses in the agricultural industry; to act as a 'call to action' and discussion piece to encourage the promotion of careers in agriculture. This is critical to attract students into primary industry and natural resource management careers, while providing opportunities for learning and development to build the skills of the next generation.

The 2023 Student Compendium working group envisions a primary industries sector that has access to an inspired and skilled workforce, and students will have clear and meaningful pathways, and are positive about primary industries careers.

Ag Institute Australia

Ag Institute Australia (AIA) is the trading name of The Australian Institute of Agricultural Science and Technology (AIAST).

Ag Institute Australia is the peak industry body for agricultural and natural resource management professionals. Ag Institute Australia is committed to advancing the profession, and the application of science and technology, for the sustainable development of agriculture and natural resource management in Australia.

Ag Institute Australia members are engaged in a wide range of activities including research, education, government, agribusiness and private consulting.

The Institute sees its contract with the community as one that demands it maintains expertise and pays heed to the implications of its activities in relation to the wider environment in which the Australian people live.

To this end, the Institute is taking the lead in maintenance of professional standards, ethical responsibilities and the recognition in professional work of the broader environmental, social and industry context in which we work.

It is also taking the lead in promoting the importance of research and development in agri-industry, and in improved training of the agri-industry workforce to ensure a globally competitive Australian agri-industry.

The SA Division holds bi-monthly meetings, produces regular e-newsletters & engages with student activities through its relationship with AUASA & other student representative bodies.

Are you passionate about your career in agriculture and natural resource management? By joining the Ag Institute of Australia, you will become part of a trusted and connected network of cross-industry professionals, and Undergraduate membership is free!

Trusted:

- AIA is the professional organisation of "agriculture and NRM"
- AIA offers National Accreditation Schemes: Chartered Agriculturalist (CAg) & Certified Practicing Agriculturalist (CPAg)
- A National Association, with active State Divisions

Informed:

- Professional Development opportunities
- Develop leadership and governance skills (3 AUASA & 3 UofA PhD rep's on AIA-SA committee)
- Awards and competitions

Connected:

- To career opportunities and industry
- To AUASA & AIA mentoring programs
- Relationships and networks (170+ SA members)
- AIA & AUASA student internships

Adelaide University Agricultural Students' Association (AUASA)

The Adelaide University Agricultural Students' Association (AUASA) is a student-led, non-for-profit organisation with the aim of enhancing the student experience for those studying agriculture-related university degrees. Formed in 2010, AUASA's objective is to facilitate student interaction with the wider agricultural industry, form a network of professionals and learn skills to help them in their early career. This assists students to broaden their knowledge and understanding of agricultural industries, find work experience opportunities and explore new career opportunities.

Highlights of the professional events include 'Growing The Future', an event attracting over 280 people including tertiary students, secondary students, young farmers, industry representatives and 30 sponsoring agribusiness, and 'AgTivate Your Career' night, which is an exclusive evening for AUASA sponsors and students. A mentoring program, 'Plant the Seed of Your Career' is also run through AUASA, and matches students with industry mentors to encourage a smooth transition from study to graduate roles.

The committee also recognises the importance of social connections within the agricultural cohort. AUASA organises and hosts social events to bring together students studying agriculture and to foster a supportive university environment. There are several social events throughout the year, including a Welcome BBQ, pub crawls, Ag Ball, Waite Vs Roseworthy football and netball games, pub nights, and graduation celebrations.

@AUASAAделаide

The University of Adelaide- Host Waite & Roseworthy Internships

A requirement of the University of Adelaide agriculture (Waite) and animal-based (Roseworthy) degrees is to complete a set number of internships or placement hours within industry. The 2023 Student Compendium provides a one-stop-shop for students to identify internship opportunities that align with their interests.

If your agricultural business can host a student to complete a proportion of their required industry hours, the University of Adelaide team will coordinate the relevant paperwork and agreements to cover off on responsibilities, agreed tasks, timing, confidentiality, IP and insurance. As students undertake internships as part of their university studies, they are generally a vocational placement under the Fair Work Act.

We ask hosts to provide interns with a project or tasks of relevance to your business or industry, suitable work space and facilities, on site supervision, health and safety induction on commencement, and feedback on the student's performance.

Host employer benefits

- There is no direct cost - internships are typically unpaid with insurance covered by the University,
- Build awareness of your sector and organisation among future graduates,
- Gain from new ideas, energy and a fresh perspective,
- Identify and attract future talent,
- Build your existing team's mentoring and supervisory skills.

The University of Adelaide internships support cultures of leadership, citizenship and innovation.

www.adelaide.edu.au/internships

Internships & Work Experience

AIA – SA Division 2024 Student Compendium Internship(s)

The AIA-SA & AUASA student compendium internship seeks to engage with up to 3 (three) Undergraduate Agricultural/Animal Sciences/Agribusiness students to;

- Provide an opportunity for undergraduate students to accrue a portion of the compulsory work experience/internship requirement (especially for students endeavouring to gain intelligence in network building, mentoring, working in a team, project management, survey techniques, hard and e-copy resource development and production and media and scientific conference writing).
- Allow the AIA (SA) and the Adelaide University Agricultural Student's Association (AUASA) an opportunity to aggregate & collate important information in the preparation of the 2024 Student Compendium.
- Provide an opportunity for AIA(SA) and AUASA to formally work together.
- Ensure the needs/wants of students are front of mind for AIA-SA, and gain from new ideas, energy and a fresh perspective. Identify and attract future talent.

This internship is carried out over the summer break ensuring the Compendium is ready for “O” Week. It will be approximately 80 hours each (at the students own negotiated pace/contribution) with students receiving a monthly “Stipend” for their contribution to the internship. This is not a paid role with respect to work cover, superannuation, WHS/OHS, professional liability or public liability, and the students are covered by the University of Adelaide’s Insurance.

Students will be members of the AIA (eligible students can access free membership), and nominations/volunteers will be sought from the Executive or membership of AUASA. The successful candidate(s) will demonstrate excellent communication skills, an inquiring mind and a genuine future interest in Agriculture, whether it be research, development and extension/adoption services. An affinity with or appreciation for rural industry, and an interest in understanding issues facing South Australian agriculture is essential.

The SA Division of the Agricultural Institute of Australia (AIA-SA) and AUASA have a keen focus on supporting the development of students and early career professionals in their life journey of having an enjoyable, productive and rewarding educational experience, while laying a solid foundation for their career.

Ag Institute Australia is the peak industry body for agricultural and natural resource management professionals. AIA is committed to advancing the profession, and the application of science and technology, for the sustainable development of agriculture and natural resource management. Members are engaged in a wide range of activities including research, education, government, agribusiness, farming and consulting.

The Institute sees its contract with the community as one that demands it maintains expertise and pays heed to the implications of its activities in relation to the wider environment in which the Australian people live. To this end, the Institute is taking the lead in maintenance of professional standards, ethical responsibilities, and the recognition in professional work of the broader environmental, social and industry context in which we work. It is also taking the lead in promoting the importance of research and development in agri-industry.

Adelaide University Agricultural Student's Association 'Plant the Seed of Your Career' Mentoring Program

It has been recognised for some time that a plethora of career opportunities exist for agriculture graduates; however many of these remain unknown or inaccessible to soon-to-be graduates. Consequently, students are completing their tertiary study with little idea of the opportunities available, or without knowing how to enter their desired career pathway.

In 2020, the AUASA President recognised this gap and created a pilot mentoring program: *Plant the Seed of Your Career*. This mentoring program is offered to third year students of agricultural science at the University of Adelaide. Applications involve written and video components, and successful applicants are paired with renowned leaders in the Australian agricultural industry who can assist the student with professional development and guide them as they prepare to enter the industry and identify the career pathway they desire to pursue.

Mentee commitment:

- Minimum of two hours per month of one-on one sessions with your mentor,
- Attendance at: Facilitated orientation session at start of program, check in session with your fellow mentees and mentors mid-program and program graduation in October,
- At least four days of work experience, provided by your mentor, if applicable,
- Further development opportunities, such as attendance at field days, meetings etc.

Mentor commitment:

- Minimum of two hours per month of one-on one sessions with mentees,
- Attendance at: Facilitated orientation session at start of program, check in session with your fellow mentees and mentors mid-program and program graduation in October,
- Provide at least four days of work experience for mentee, if applicable,
- Recommend/facilitate further development opportunities, ie attendance at field days, meetings etc.

KEYWORDS: Mentoring, work experience, career pathways, final year students, facilitated sessions

Microbrewery Projects - Practical Experience

Engineer the Perfect Pint! Improve the next generation of Australian beer using other grains, optimise the malting process or develop new innovative processes. In this series of projects, a beer style will be researched and brewed to produce a good example of the style. The resultant beer will be analysed using mass spectroscopy and sensory analysis to provide a better understanding of what makes this style "classic".

A few examples of projects:

- Brewing with grain other than barley
- Art and Brewing: painting with flavours, aromas, colour and sound
- The Drunken Monkey: prehistory and history of fermentation

A minimum of 4 weeks is required for all students (Undergraduates and Masters).

Dr Philip van Eyk

8313 6081

philip.vaneyk@adelaide.edu.au

KEYWORDS: Project, internship, undergraduates, postgraduates, beer, malting

South Australian Research and Development Institute Opportunities in Crop Science

The South Australian Research and Development Institute (SARDI) is the research division of the Department of Primary Industries and Regions (PIRSA). SARDI undertakes applied industry focused research in partnership with farming system groups, agribusinesses, government agencies, universities and research partners. SARDI aim to grow South Australia's primary industries and regions to be internationally competitive and sustainable.

SARDI employs staff across the three research divisions of crop sciences, food sciences, aquatics and livestock sciences with research undertaken at locations throughout the state. Within crop sciences, the major areas of RD&E focus include:

- Agronomy and soils
- Crop improvement
- Entomology
- Irrigated crops
- Plant health and diagnostics

There are many opportunities arising for undergraduate and postgraduate students (inc. Honours, PhD students and interns) to gain valuable experience working with SARDI researchers on RD&E projects. Casual, part-time and full-time work opportunities are frequently advertised throughout the year on the <https://iworkfor.sa.gov.au/> website.

<https://pir.sa.gov.au/research>

pirsa.sardi@sa.gov.au

KEYWORDS: Casual, part-time, full-time, employment, agronomy, soil, crop improvement, entomology, irrigated crops, plant health and diagnostics

Thorndon Park Produce- Feed the Need program

Thorndon Park Produce is a family run business growing and supplying vegetables to local SA wholesale markets, supermarkets, interstate markets, processors and local retailers.

Over the year Thorndon Park Produce offer multiple "Feed the Need" programs to university students. This program allows students to gain hands on experience planting or working on a crop and to learn the very basics of growing. After the practical component is completed, various industry members such as agronomists, supply reps and researchers are invited to have a network session with the students. This 5 hour program provides a great foundation for students to begin looking at their options outside of university and to advance their future careers in Horticulture.

Students who complete the program will become a part of the Feed the Need network group and be offered various work experience opportunities. Adelaide University will provide program details when available.

KEYWORDS: Horticulture, work experience, networking

Kalyx Casual Employment and Work Experience

Kalyx leads the way in agricultural research. We advance new technologies to market in the shortest possible timeframe by delivering data and insights, partnering with clients to test tomorrow's agriculture today. Casual employment is a great way to see the type of work Kalyx does during our peak seasonal periods whilst also gaining valuable industry experience. We take on the majority casual employees for seeding and harvest that usually lasts for approximately 6 weeks from Mid -April to End of June, and Harvest throughout November to December. There are also opportunities throughout the rest of the year to incorporate horticultural and summer operations also.

KEYWORDS: Research, technology, crop protection, horticulture

Viterra Harvest Work

Each year, Viterra recruits around 1500 people across its storage and handling network for the harvest season. These jobs are generally available from October through to January, with training provided and opportunities to stay on longer. A harvest job with Viterra is ideal for those looking for summer work outside of their studies, to explore regional South Australia or gain work experience, in an exciting environment. Viterra is committed to ensuring responsible and safe operations to create value in a manner that is sustainable, transparent and respectful of their customers, employees, communities and environment.

KEYWORDS: Harvest, grain, seasonal work, casual employment, training

Australian Pork Ltd - sponsored Undergraduate Industry Placement Awards (Pork SA)

The APL - sponsored Undergraduate Industry Placement Awards provide an opportunity to develop greater confidence in pig handling skills whilst undergoing placement in SA piggeries during January and February. These awards are designed to provide students with first-hand exposure to commercial pig production practices, and to develop their interest in pursuing a career within the pork industry after graduation. In SA, the program is supported by Pork SA, enabling industry consultant Graeme Pope to assist students with their award applications, to locate their placement farms, and to conduct on-site introductions to farm staff.

Delta Agribusiness

Established in 2006, Delta Agribusiness provide rural inputs and advisory services to clients and operate across New South Wales, Victoria, Queensland and Western Australia. Delta Agribusiness is an independent, privately owned company that has been built on the foundations of an inclusive shareholder model. The model allows the opportunity for any employee who meets the criteria to become a shareholder. Delta is looking to attract and retain the best people and are always looking for those who are passionate about rural communities and who want to work to add value to clients, to join their team.

Bec Milliken (HR Manager)

recruitment@deltaag.com.au

KEYWORDS: Employment, advisory, agribusiness

SA Dairyfarmers Association (SADA): Internship

Accounting for approximately 6% of Australia's milk and almost a billion dollars in generated revenue, the South Australian dairy industry is well positioned to target the premium end of the national and international market. SA's dairy industry consistently produces a product which is demonstrably of a higher standard than the rest of the country and SA milk is highly valued by processors for both its quality and record high butterfat and protein values.

The SA dairy industry is actively welcoming undergraduate project interns, interested graduates and casual employees to work across the three industry organisations (SADA, DairySA and DairySAFE), at the coal face of dairy and in the many service industries which support it. Those interested are urged to contact SADA or the other organisations directly.

Alison Amber (SADA Administration)

(08) 8293 2399

KEYWORDS: Dairy, internship, causal, employment

Australian Grain Technologies (AGT)

AGT was established in 2002 to ensure the long-term wheat breeding in Southern Australia and has expanded to operate four main plant breeding stations across WA, SA and NSW. AGT is a research and development business working within the grain sector, focusing on wheat, barley, durum, lupins and canola.

AGT are available to talk with students about career opportunities within AGT, whether that be in general agricultural science and technology, field experimental work, plant breeding, data analysis, agri-business or agri-marketing. Throughout busy periods AGT look for energetic, motivated students with a passion for agriculture and science to come on board in casual employment positions. New, permanent job opportunities with AGT are also advertised as available.

Dan Vater (GM, Marketing & Seed Production)

KEYWORDS: Casual employment, research, plant breeding

CommBank Summer Intern Program

This 10 week Summer Intern Program, running from late November to early February, gives participants an idea of what it's like to work with CommBank. At the end of the Summer Intern Program, participants will have the opportunity to apply early for the Graduate Program.

Participants will undertake an intensive introduction to CommBank and undergo placement; being partnered alongside leaders and teams which allows participants to work on challenging real-life projects. During the placement interns will be encouraged to build professional networks with peers and with leaders from across CommBank. Interns will have the opportunity to build transferrable skills through a combination of formal learning events and workplace-based learning. This program is designed to support identification of strengths and showcase them at the end of the placement.

CRAIG DAVIS
Independent Agronomy Services

Does your farming business strive for:

- A productive, efficient & profitable farming system?
- Precision & accuracy in your applications?
- Integration of all units?

Do you require:

- Timely & individual advice?
- Experience & expertise?
- All at your paddock level?

Craig Davis (B. Ag Sc) has a wide range of experience in Broadacre Agronomy, covering the full range of dryland production environments within South Australia.

With extensive nutrition & fertiliser knowledge, livestock integration, machinery knowledge & experience in farm business analysis, I am now available to discuss your Agronomy consulting requirements.

Grid sampled soil testing and site specific plant tissue analysis and interpretation supplement farm planning (and expansion analysis), regular in-paddock monitoring & remote but personalised farm business support.

Regional Development Australia (Adelaide Metro)

Regional Development Australia (RDA) is a national government initiative that seeks to strengthen and grow the regions and has been setup as a partnership between federal, state, territory and local governments. Within South Australia there are eight RDA's, consisting of RDA Adelaide Metro, and seven regional entities. RDA Adelaide Metro seeks to create, connect and support economic opportunity for Regional SA, within and across the seven other South Australian RDA regions. RDA Adelaide Metro is passionate about working with key stakeholders in Adelaide, such as Universities, TAFE SA and RTO's to ensure that students and graduates are aware of the various casual, seasonal, intern or permanent agricultural roles available in South Australia.

GAIN EXPERIENCE. GROW YOUR KNOWLEDGE. CULTIVATE A CAREER YOU.

For over 20 years Kalyx has led the way in agricultural research. We advance new technologies to market in the shortest possible timeframe by delivering data and insights, partnering with clients to test tomorrow's agriculture today.

Kalyx proudly operates out of 15 regional branches across Australia with over 100 dedicated and passionate staff. Our people are at the heart of everything we do. For Kalyx to realise its potential we know we must support and inspire our team to achieve theirs.

When you work with us you will be part of a team dedicated to advancing agriculture. Working on next generation technologies and solutions to test their suitability and efficacy

for Australian farmers. A team focused on delivering the best possible results to clients through scientific expertise, a national presence, and accurate data delivery.

If you are looking to work for a leading agricultural business, with internal training and the opportunity to build strong networks throughout the crop protection, breeding and horticulture industry then contact us today to hear about our graduate program and opportunities.

THE ULTIMATE GROWTH OPPORTUNITY

Connect with us @kalyxaustralia

Find out more at kalyx.com.au.

Kalyx

Cultivate a career you love.

Kalyx leads the way in agricultural research. We advance new technologies to market in the shortest possible timeframe by delivering data and insights, partnering with clients to test tomorrow's agriculture today.

Working at Kalyx provides you the opportunity to join a thriving agricultural business, have fun and explore your ability. There are many areas of employment within Kalyx throughout Australia.

- **Research Agronomists:** Responsible for independent research programs, have a agricultural/horticultural science-based education and enjoy working outdoors.
- **Research Technicians:** Responsible for trial maintenance and harvest/seeding operations. Good with machinery, hands on and enjoy working outdoors.
- **Research Support Team:** Office-based, responsible for the administration of client data and communication with field research staff. A mix of agricultural/horticultural science, applied science and communication graduates have taken on this role.
- **Commercial & Administration staff:** Responsible for the everyday running of our business; including a range of roles including branch admin, finance, accounting, and IT services.

Opportunities for Graduates

Being a Kalyx graduate gives you the opportunity to work with the best and explore where you would like to take your career in agriculture. You are our future, and we are committed to investing in your development to help you reach your potential. In their first year all graduates will participate in:

- **The XSeed Graduate Program:** XSeed has been developed by Kalyx for Kalyx. Each graduate will work through 12 modules aimed at developing a mix of technical and practical skills. XSeed is the first step on our development pathway for those with passion and enthusiasm for what we do.
- **National Agronomy Camp:** Every year Kalyx looks to bring together all our graduates from around the country for our agronomy camp, not only is this an opportunity to build your practical and technical skills, it is also an opportunity to build your network with both graduate and senior agronomists from other regions.

Why work for Kalyx?

When you work with us you will be part of a team dedicated to advancing agriculture. Working on next generation technologies and solutions to test their suitability and efficacy for Australian growers.

If you are looking to work for a leading agricultural business, with internal training and the opportunity to build strong networks throughout the crop protection, breeding and horticulture industry then we would like to hear from you.

**Are you interested in finding out
about Elders Early Career Programs?**

Scan the QR code and enter your details
to keep up-to-date with any upcoming
opportunities.

eldersrural.com.au

Elders

Elders is one of the most recognised names and most trusted brands in Australian agriculture. We offer Early Career Programs across a number of fields, designed for the next generation of agriculture professionals.

Our programs offer:

- Rotations and experience in genuine roles, doing real work from day one
- Opportunities to create a positive social impact on the communities in which we operate
- Learning and development opportunities designed to build critical skills
- Ongoing coaching, mentoring and exposure to experienced leaders
- Permanent position at Elders the end of the programs

We'll support you every step of the way with on-the-job experience, dedicated coaching and professional development. You will also participate in our twice-yearly development summit which has been specifically designed for all our early career participants and includes workshops, guest speakers, and networking. It's a chance for you to get to know all the participants and the various early career programs.

<https://eldersrural.com.au/about-us/careers/>

Rural Products Trainee Program

Elders' Rural Products program is a 12-month entry level program specifically designed to launch your career in rural products sales. As part of the program, you'll have the opportunity to work in one of our branches while being mentored and guided by Elders' experienced employees and leaders. You'll learn and practice effective selling and relationship building techniques that reinforce Elders' role as partners with our clients. You'll also gain a broad understanding of Elders and the agricultural industry, and upon completion of the program, you'd have all the skills and knowledge necessary to succeed in your career and make a difference in on-farm productivity.

KEYWORDS: Retail, products, development

Livestock Trainee Program

Elders' Livestock Career Development Program will offer you the opportunity to work in both saleyard, paddocks and branch environments, being mentored and guided by Elders' experienced employees and leaders, to learn and practice effective selling and relationship building techniques. The program runs for 18 months where you will undertake three personalised rotations between Elders branches. These rotations are designed to provide you greater exposure to the business and give you the opportunity to grow your skills across different livestock, market conditions and teams.

KEYWORDS: Livestock, cattle, sheep, wool, nutrition, stock, professional development

Graduate Agronomy Program

The Elders Graduate Agronomy Program is a two-year program specifically designed to launch your career as an agronomist, a trusted role providing leading advice to growers to improve their yields. You will go through two six-month rotations in your first year, which will focus on building your foundational understanding of crop segments and what it means to be an agronomist at Elders. This will be followed by a 12-month rotation in your second year, where you'll have the opportunity to specialise in a crop segment of your choice. These rotations are designed to expose you to both horticulture and broadacre areas, expanding your knowledge of each. Graduates need to be willing to relocate throughout the Elders network.

KEYWORDS: Agronomy, consulting, research, soil, professional development, horticulture, broadacre

Elders Corporate Graduate Program

The Graduate Corporate Program prioritises hands-on training, allowing you to apply your learnings to real problems and make real contributions to the business and Australian farmers. We offer various streams in the Corporate Graduate Program such as Marketing and Communications, Finance, and IT. Each program runs over two years, with the opportunity to gain exposure to the business via four rotations which have been designed to build your foundational understanding of the business as well as your skills and experience in critical areas and steam disciplines. You'll receive guidance and training from experts in the field in each rotation and be assigned a mentor who will support you through the program, providing additional coaching and advice.

KEYWORDS: Agribusiness, finance, communication, marketing, professional development

Pinion Advisory

Pinion Advisory is a nationwide consultancy with offices in every state of Australia and an experienced team with diverse skills. Pinion provides advice to their clients in a wide range of services from grain marketing, business and people management through to environmental monitoring, water resource management, agronomy and soils. Pinion Advisory provides prospects for employing and developing graduates through their graduate development program. There are opportunities to work across farm business services in livestock, agronomy, business management, grain marketing or environmental services enabling the graduate to finish the program with a well-developed approach to farm business consulting.

Graduates will:

- Be exposed to a variety of roles and experiences.
- Learn from experienced consultants across a diverse mix of service areas.
- Be working for a professional, well-established, international company.
- Be supported with a dedicated 'Grad. Champion' to assist in each office.

KEYWORDS: Agronomy, consulting, agribusiness, grain marketing, soil, livestock, water resources

AWI Graduate Training Program

The AWI (Australian Wool Innovation) Graduate Training Program is designed for graduates from a broad cross section of disciplines who have a background in, or connection with, the Australian wool industry. The 18-month program starts each year in March and provides the successful applicant/s with a thorough understanding of the wool supply chain from fibre to fashion.

Based primarily at the AWI office in Sydney, the graduate/s will also be given the opportunity to gain a global exposure to the wool supply chain through two three-month international rotations. Whilst in Sydney, the graduate will gain exposure to sheep production, woolgrower services, processing innovation & education extension, and marketing.

AWI wants to use this program to not only build a talent pipeline for the business but also source and develop graduates who have a real passion for the industry.

For more information: <https://www.wool.com/about-awi/contact-us/graduate-training-program/>

KEYWORDS: Wool, sheep, fibre, supply chain, extension, marketing

AuctionsPlus: Careers

AuctionsPlus is an independent digital trading platform offering access to information and choice to the Australian agricultural community. AuctionsPlus provide digital solutions to enable better agricultural trading. AuctionsPlus is changing the shape of the agricultural sector through targeted and researched industry solutions, focusing on the capability for technology to improve the industry nationally.

AuctionsPlus offers a range of career opportunities across a variety of skillsets, including operations, customer support, marketing, business and software development. AuctionsPlus are a dynamic, exciting team on the lookout for great people.

Nutrien Ag Solutions

Unique career experiences

As part of our unique and diverse offerings, we invest heavily in early careers knowing that YOU are the future of the industry! In addition to general recruitment, we offer our exciting structured 2-year Early Careers Programs including our multi-discipline Graduate Program & our Livestock Trainee Program with a focus on technical knowledge and skills, Nutrien business acumen and personal development opportunities.

During the 2-year programs, all graduates/trainees will receive leadership and skill-building workshops, under the guidance of a mentor to support your development and set your career goals, as well as a buddy to familiarise you with the Nutrien business.

Make a difference knowing your purpose for coming to work every day is real and impactful - Going Further.

The breadth of our global ag solutions business is diverse with endless opportunities to grow your career, and with localised benefits and rewards to suit. What are you waiting for?

Kick-start your career with Nutrien

How to apply

You can stay tuned for our Early Careers Programs via our careers page where applications will open further into the year. You can sign up to our job alerts for future intake dates and follow us on LinkedIn, or explore real graduate stories on our GradAustralia.com.au page. Alternatively, check out our Current Vacancies page for entry level positions via the QR code below.

A world of opportunity awaits!

To find out more about Nutrien Ag Solutions and our unique career experiences, go to www.nutrienagsolutions.com.au/careers or follow us on LinkedIn.

Nutrien Ag Solutions Graduate Program

Our annual multi-discipline graduate program will see you join the Nutrien Ag Solutions family as a permanent employee with the first two years aligned with a structured learning program. We will provide you with loads of support to help maximise your development and ensure you are set up for success whilst having a lot of fun along the way. We offer multiple graduate streams including our Agronomy stream, Agribusiness stream, and our Business Support Services stream, all allowing you to make real and impactful differences whether it be in agronomy or finance – there is a diverse multitude of opportunities.

So, what can you expect?

- Accelerated learning opportunities to kick start your career in agriculture.
- Local employer with a local heartbeat with global resources with a workforce of over 23,000 employees and a presence in 14 countries. We are the world's largest provider of crop inputs, services, and solutions. The breadth of our business is diverse with endless opportunities to grow your career with Nutrien.
- Professional development opportunities to improve your business acumen, communication, problem-solving and data analysis skills, as well as your leadership capabilities.
- Professional networking opportunities to allow you to socialise with your peers and leaders at Nutrien.
- Support from business and industry leaders to develop personally and professionally. We offer an attractive salary package and localised benefits and rewards so that whether you work in metro or rural Australia the benefits are relevant to you. You'll be inspired, knowing we're invested in you.
- A range of locations in various regional towns across Australia as well as in our metropolitan locations.

SA grain growers funding research solutions

SAGIT is proud to support career pathways for agricultural graduates. There are currently four projects designed to provide internship opportunities across applied and field research. In addition, SAGIT is funding an innovative school and university crop competition and Lead Agriculture Teacher role to support secondary school teachers.

Current internship projects include:

Two projects on the Eyre Peninsula are designed to improve the capacity of grains research, development and extension and to further develop applied research skills of recent graduates so they can make an improved contribution to the grains RD&E industry in SA. Interns work at Minnipa Ag Centre and with independent agronomists, as well as conducting individual projects.

AEP1422: EP internship in applied grains research 2023-24:
Naomi Scholz, 0428 540 670, eo@airep.com.au

EP120: EP internship in applied grains research:
Andrew Ware, 0427 884 272, andrew@epagresearch.com.au

At Hart, SAGIT has most recently supported their two-year internship, from March 2021. The intern also undertook a 4-6 week placement with SARDI on a project relevant to Hart research.

H120: Regional internship in applied grains research:
Rebekah Allen, 0428 782 470, rebekah@hartfieldsite.org.au

A further intern project links to the Federal Government Future Drought Fund which has a SA Hub, to demonstrate and increase grower adoption of innovative drought resilience tools, technologies and practices. The SA Drought Hub extension intern will run a series of workshops to extend the outcomes of previous SAGIT investments aligned to the Hub.

S/UA721: Extension support for SA Drought Hub internship program:
Kathy Ophel-Keller, 8303 9368, kathy.ophelkeller@sa.gov.au

Other projects supporting agriculture careers:

The AgXtra wheat production competition for high school students and university agricultural students promotes agriculture as a career choice and engages tertiary students with agribusiness and consultants for career option awareness. The competition promotes hands-on learning and moves students out of the classroom and into the field to experience, and participate in, field crop agronomy.

AGX3822: AgXtra high school and university crop competition:
Richard Porter, 0413 027 670, rporter@agxtra.com.au

The lead agriculture teacher pilot program includes the appointment of a leading agriculture teacher to mentor, support and train ag teachers across SA and to engage students in meaningful food and fibre production content. The role will assist teachers seeking access to new curriculum content and individualised support to revitalise their teaching programs across all secondary year levels.

AGC432: Lead agriculture teacher for SA – growing curriculum and learning:
Belinda Cay, 0423 295 576, belinda.cay@agcommunicators.com.au

CommBank Graduate Program

Applications for the 2024 Graduate Program open in February 2023 with roles available nationally across both metropolitan and regional locations however most roles are based from Sydney.

Graduates will start in February as permanent employees, but the length of the graduate program varies based on business area chosen with most programs running for 18 months.

Graduates will attend an orientation in Sydney, where they will hear from senior leaders and renowned speakers whilst networking with fellow graduates. Graduates are also offered tailored development sessions to identify focus areas. Graduates will complete a rotational program to help learn about the different parts of the chosen business area. At the end of the program, participants will be supported to find a role that best suits their capabilities and interests.

AgXtra

AgXtra

Established in 2002, AgXtra is a privately owned contract research organisation specialising in applied field research. We are passionate about leading the sustainable evolution of agriculture in Australia, by facilitating the development and adoption of new technology for our farmers on behalf of our clients, and by providing opportunities for the next generation of Australian Agriculturalists. AgXtra currently employs over 35 full time personnel across South Australia, NSW and Victoria. The business has forged a reputation for providing quality career development and advancement opportunities, commencing with work experience roles for undergraduates including summer work, through to career pathway training for permanent employees.

AgXtra's Research Officer Program provides a foundation for a career in Applied Field Research. Candidates gain research and agronomy experience, working closely with growers, agronomists, and leading R&D entities. The program offers exposure to a diversity of roles in the business, with opportunities to join any of our SA, VIC or NSW offices and can be undertaken with either a broadacre or horticultural focus. At the completion of the program, candidates retain full time employment as a Research Officer with AgXtra. Jess Heaslip, Graduate Technical Officer (Broadacre) says "In my first year at AgXtra, I've had guidance and assistance from professionals within the business who have helped me to build valuable skills and knowledge. AgXtra has greatly supported my transition from university into the industry and given me the right guidance and assistance I need to begin my career."

University of Adelaide: The Centre for Global Food and Resources (CGFAR)

New course available for undergraduate students- Experiences and Insights in Agri-food Systems

This course is targeted to students who want to gain practical experience with leading agribusiness firms in South Australia. Students will be introduced to some key principles around understanding value chains & industry networks, focusing on end consumers & market requirements, innovation, business to business collaboration & competition and an overview of the South Australian food industry. On the field trips to a variety of local agribusiness firms, senior company managers will present on their business strategy, challenges and opportunities, before allowing interactive discussion and questions from the students. This course is designed to give students a competitive edge by not just explaining the background theory but by exposing them to the practicalities of running a successful agribusiness firm in today's global marketplace. This course is available to 3rd year Bachelor of Agricultural Science and 3rd year Bachelor of Viticulture and Oenology students. Limited place available in 2023.

<https://www.adelaide.edu.au/course-outlines/111201/1/sem-1/>

KEYWORDS: Agribusiness, value chains, consumer and market requirements, field trip

University of Adelaide: The Centre for Global Food and Resources (CGFAR)

Free course- Understanding Agribusiness, Value Chains and Consumers in Global Food Systems

In a global food system impacted by growing populations, economic growth, globalization, climate challenges, disruptive technologies, and evolving consumer demands, we must find smarter ways to produce food and to operate food businesses. Guided by the team at The Centre for Global Food and Resources, this course will introduce the concepts at the heart of agribusiness; including value chain thinking, the dynamics of markets, and the changing nature of consumer behaviour. You will gain an understanding of food markets and the distinctive factors that influence them. There will be a focus on the role that consumers play in the value chain, drivers of food choices and what changing food demand means for agribusiness.

What we can offer students

- Annual Eyre Peninsula internship in applied grains research, funded by SAGIT
- Free membership and access to technical agronomic content
- Free entry to events including field days, workshops and forums

Eyre Peninsula internship in applied grains research

The EP internship program is funded by SAGIT, and aims to improve the capacity of grains research, development and extension (RD&E) in the Eyre Peninsula region, by further developing applied research skills of recent graduates.

During the 12 months (February-January) the intern/trainee will gain skills in trial design, trial management, sampling, statistical analysis, general crop agronomy, extension practices including written and oral communication with growers and advisors and event delivery.

The intern will work with local research organisations including EPAG Research, based in Port Lincoln and SARDI Minnipa Agricultural Centre, as well as local independent consultants. During the 12 months the Intern will run a small research project, where they design, implement, analyse and write up a field trial relevant to growers in the region. The intern will gain experience working across a range of research projects that AIR EP, EPAG Research and SARDI are currently delivering.

What else do we offer students?

- A point of contact for work experience opportunities on Eyre Peninsula,
- Free membership and access to technical information including the quarterly agronomic newsletter,
- Free entry to AIR EP events, a good chance to build networks and knowledge,
- Free subscription to the AIR EP e-newsletter with the latest events and industry information.

KEYWORDS: Financial assistance, education expenses, rural, tertiary study, VET, secondary students

Marcus Oldham Scholarship Program

Marcus Oldham provides a scholarship program for students enrolled in or intending to enrol in either Agriculture, Agribusiness or Equine Management courses.

A scholarship provides financial assistance towards tuition or residential fees and is generally available for the first year of study and, in some cases, subsequent years. Selected scholarships are available to applicants with severe financial constraints (which would prevent them from studying at Marcus Oldham).

New scholarships may be added throughout the year, so keep referring to the link below for more information. In most cases, scholarships do not bind you to working for the sponsor although good employment opportunities may be available after graduation.

<https://marcusoldham.vic.edu.au/courses-enrolment/scholarships>

KEYWORDS: Agriculture, agribusiness, equine management, undergraduate

Lois Harris Scholarship

The Agricultural Bureau of South Australia provides the Lois Harris Scholarship to encourage senior high school students to consider undertaking agricultural studies at tertiary level in South Australia.

The \$2000 Lois Harris Scholarship is awarded to one full time first year student enrolled in the Bachelor of Agricultural Sciences at the University of Adelaide.

Eligible students must have undertaken Year 12 studies in South Australia and be Australian Citizens or permanent residents.

Selection will be based on the TER (Tertiary Entrance Rank) or on the recommendation of the Associate Dean, Undergraduate Studies after consultation with the Board of the Agricultural Bureau of SA.

<https://www.agbureau.com.au/awards/lois-harris-scholarship>

KEYWORDS: High school students, first year university, agricultural science

Primary Producers SA: EW Stevens Trust

Are you from a regional area of South Australia and facing financial barriers to continue with your chosen study? The EW Stevens Trust was designed to assist you, with annual funding of up to \$5000 available per applicant. Established in 1988, following a bequest to the-then United Farmers and Stock Owners of SA by the late Mr Earnest William Stevens, the objective of the trust is to help advance further education.

Responsibility for the fund was later transferred to the now-defunct South Australian Farmers' Federation and PPSA is now proud to be its custodian.

What the scholarship funds can be used for is very open: it could be a contribution towards school fees, books or other course materials, uniforms, undertaking a study tour, IT equipment, board and accommodation or travel costs to return home from study.

The application process is straight forward and includes a written statement of no more than 500 words, which outlines your future career goals and aspirations, your commitment to support rural and regional South Australia and how the funds will be used to help you to overcome your financial constraints.

<https://ppsa.org.au/scholarships/>

KEYWORDS: Financial hardship, university students, high school students, regional location

E.W. STEVENS
— Trust Fund —

PROUDLY SUPPORTING THE EDUCATION OF RURAL KIDS IN HARDSHIP SINCE 1988

Do you need a hand to continue on with your studies?

The E.W. Stevens Trust provides support to regional South Australian students in financial hardship, giving them a helping hand to continue on with their studies.

Primary Producers SA is the Trustee of the scholarship and funds can be used to provide essential school resources. The Trust provides scholarships of up to \$5000 of eligible costs for anyone applicant in any one year. It is capped at \$5000 per student annually, but you can apply again the following year. Applications open in October and details can be found at ppsa.org.au/scholarships.

Who is eligible?

- 
Regional secondary, tertiary or VET students who are dependents aged 16-25.
- 
Australian citizens or permanent residents who can demonstrate they are in financial hardship.
- 
Evidence of financial hardship needs to be provided but this can be as simple as being a Rural Business Support client.

PO Box 209, KENT TOWN DC SA 5071 | t: 08 8297 0899 | e: ewstevens@ppsa.org.au | ABN: 72 496 581 201

The J E Jenkins Scholarship

The J E Jenkins Scholarship supports commencing or continuing students undertaking an undergraduate program in Agriculture, Social Sciences or Sociology at the University of Adelaide.

Applicants must be Australian Citizens undertaking study as a Commonwealth supported student and remain enrolled on a full-time basis in the program for which the Scholarship was approved. Applicants must be residents at one of the residential colleges affiliated with the University of Adelaide or in other University affiliated accommodation.

Selection will be made according to academic merit and preference given to students who have relocated or served in the Commonwealth armed forces. The Scholarship must be taken up in the year in which it is offered. Students in receipt of other University of Adelaide Scholarships may apply.

KEYWORDS: Animal science, agricultural science, academic merit, financial need, undergraduate

Grasslands Society of Southern Australia: Joyce Gillepsie Student Bursary

The Joyce Gillepsie Bursary provides financial assistance to students studying agricultural science or farm business management.

To be eligible for a student bursary the following criteria must be met:

- Current membership (student or family) of the Grassland Society of Southern Australia,
- Studying a diploma or degree course in agricultural science or farm business management on a full-time basis with subjects linked to grassland farming,
- Be in the final year of study and not be in receipt of any other scholarship, grant or cadetship.

Selection will consider a commitment to the grazing industry and academic achievement.

<https://www.grasslands.org.au/membership/student-bursary/>

KEYWORDS: Grazing, livestock, financial need

Herefords Australia: CM Hocking Scholarship

Applications for the CM Hocking Scholarship will be considered from Australian citizens undertaking a course of study that will be applied to the breeding, care and maintenance of Hereford cattle and/or will be of benefit to the Australian Hereford industry.

Applications are to be in writing and include the following:

- Details of course and place of study.
- Education and employment history (if applicable) of applicant.
- Contact details of two (2) referees.
- Mailing address, email address and telephone contact number of applicant.

Applicants may be required for interview which is normally conducted by telephone.

<https://www.herefordsaustralia.com.au/youth/cm-hocking-scholarship/>

KEYWORDS: Cattle, breeding

JB Fairfax Award for Rural & Regional Journalism and Communications

This award provides an opportunity to gain practical experience in rural and regional reporting and includes a \$10,000 scholarship along with three internships providing practical work experience.

Applicants for the Award must:

- Be enrolled in any undergraduate or postgraduate courses of relevance at an approved Australian education provider,
- Demonstrate an active interest in rural and regional affairs and in pursuing a career in journalism/communications upon graduation,
- Be an Australian citizen or permanent resident aged 30 years or under.

Rural Bank Scholarship

Rural Bank will be seeking first time tertiary students looking to pursue studies in agriculture, agribusiness or related fields and who are committed to the success of Australian agriculture. Rural Bank are seeking applicants who are keen to contribute to the Australian agriculture industry and rural and regional communities. Rural Bank are also looking to support Indigenous students who are passionate about the industry and are keen to make a difference to the future of Australian ag. Applications for the 2024 Scholarship program will open in December 2023.

The program will assist outstanding students from rural or regional areas, who have been offered a full-time place at an Australian university, ag college or TAFE for the first time. Students must be undertaking an agri-related degree. Rural Bank's Scholarship Program supports students' study-related expenses. Each scholarship is valued at \$5,000 per year and, subject to academic results, the scholarship can be extended for a second year of study.

APL Undergraduate industry scholarship

The undergraduate industry scholarships are targeted towards students conducting their undergraduate degrees. Students are funded to do a placement at a piggery for a minimum of 2 weeks (up to a maximum of 8 weeks) to gain a greater understanding of the pork industry and to gain hands on experience with the production system of the pork industry. The aim of the award is to recognise high calibre undergraduate students and foster their interest in pursuing a career in the pork industry. Scholarships are provided of up to \$500 per week of piggery placement and a final report on the student's experiences is submitted to APL.

Please note: All applications for an undergraduate industry scholarship must be received via PigConnect a minimum of six weeks prior to the placement beginning.

High School & Vocational Education and Training (VET)

Ramsey Bros: Agricultural Service Technician Apprentice Intake

Over 4 years apprentices will be working alongside qualified Technicians to learn the 'how' and 'why' of maintaining the complex systems of a wide range of farm machinery. With periodic one-week blocks of face-to-face learning at a local TAFE, apprentices will graduate with a nationally recognised Cert III in Agricultural Mechanical Technology.

The apprenticeship will be as broad as possible through hands-on work, manufacturer training and an Apprentice Exchange Program. Apprentices will work on diesel engines, hydraulics, electronics, pneumatics, fluid and mechanical systems. Qualify in air-conditioning system maintenance and repair. Prepare, install and deliver new machines. Maintain and repair farm machinery in a workshop setting and undertake fault-finding and repair of machinery in the field.

<https://ramseybros.com.au/intake>

KEYWORDS: Apprenticeship, TAFE, Cert III in Agricultural Mechanical Technology

Ramsey Bros: Year 12 Awards for Excellence in Agriculture

These awards allow South Australian high schools to recognise their leading Year 12 agricultural students whilst promoting their agricultural courses and teachers. Four awards are presented annually to individual Year 12 students who have completed a SACE Stage Two agricultural subject at an exceptional level, while also making a significant contribution to their school's or community's agricultural activities through innovation or involvement.

Each award winner receives a \$250 prize and one week's work experience at their nearest Ramsey Bros branch. This experience will provide the opportunity to work alongside Technicians, Sales Advisers, Parts Interpreters and Integrated Technologies Consultants. The awards are presented in association with the Agricultural Teachers Association of South Australia (ATASA). Students must be nominated by their teacher.

PIEFA's mission is to engage Australian schools and communities through the education of primary industries production and careers.

Explore where your food and fibre comes from!

Primezone is PIEFA's online resource hub, packed with a huge range of free, Australian curriculum-driven, high quality, vetted primary industries education resources for Foundation through to Year 12.

To support the Primezone resource hub, **Primezone Academy** provides teachers and students with single-point access to a range of primary industries eLearning courses.

Career Harvest is a one-stop shop for prospective students and job seekers to discover the many rewarding careers and career pathways in the agriculture industry, including scholarships and other opportunities.

Farmer Time provides real-world context for students in F-12 as they connect with a farmer, fisher or forester and take a virtual tour where they interact and ask questions.

Primary Industries Education Foundation Australia (PIEFA)

Primary Industries Education Foundation Australia (PIEFA) is a national, not for profit company that strives to enhance young Australians' knowledge about where their food and fibre comes from – and about the vast range of careers in agriculture.

A recent Grattan Institute report states that teachers need more classroom resources, written for the curriculum and specific to their subject areas. PIEFA endeavours to fill this gap, providing curriculum support through its range of programs and online platforms.

PIEFA facilitates, coordinates, develops and promotes food and fibre education initiatives to teachers, schools and the broader community, and below is an outline of PIEFA's current programs and projects. During the 2021-2022 period, PIEFA has engaged with over 2,200 schools and over 10,000 teachers.

Primezone (www.primezone.edu.au) is PIEFA's flagship website where all of PIEFA's programs are linked. Primezone contains over 700 cross curricular teaching resources for K-12.

In collaboration with National Farmers' Federation, PIEFA is a stakeholder in the **AgCAREERSTART** program (www.agcareerstart.com.au), supporting the promotion of this innovative gap year program that offers 1-year of paid training and experience in an agricultural setting, to schools and students across Australia.

Career Harvest (www.careerharvest.com.au) is PIEFA's food and fibre careers website, which was re-launched in 2022 with a new look and many additional features. It contains career descriptions, scholarships and opportunities, job boards, gap year programs, day-in-the-life videos, and much more career information.

Primezone Academy (www.primezoneacademy.edu.au) was established in 2021 in response to COVID-19 lockdowns. This platform provides teachers and students with a range of online interactive courses that are linked to Primezone resources.

The **Farmer Time** program (www.farmertime.com.au) connects the farm to the classroom with in-person and live-streamed incursions. Through the Educating Kids to Ag project, funded by the Department of Agriculture, Fisheries and Forestry, and in collaboration with the Victorian Farmers' Federation, the program has grown with a huge number of teaching resources produced (<https://farmertime.com.au/produce-it-protect-it>).

PIEFA has a monthly **newsletter**, which can be subscribed to here: <https://www.piefa.edu.au/piefa-newsletter.html>. The newsletter communicates information about food and fibre education. PIEFA has a strong presence on social media (Facebook: @PIEFAus | Instagram: @ozpief | Twitter: @OzPIEF).

All new resources come with a pre-recorded **teacher webinar** that explains how to teach the resource in the classroom. PIEFA also collaborates with NSW Department of Primary Industries and Royal Agricultural Society of NSW on the Knowing and Growing teacher professional development program of workshops.

PIEFA has been privileged to receive funding through the Department of Agriculture, Fisheries and Forestry to work on farm safety, soils and grains resources and fortunate to collaborate with Agricultural Shows Australia, Soil Science Australia and Soils for Life on these initiatives.

Luciano Mesiti (CEO of PIEFA)

Food and Fibre Education

WITH THE AGCOMMUNICATORS TEAM

AgCommunicators' education team – Belinda Cay and Sue Pratt – have an expert and practical knowledge of the Australian school curriculum. They work in classrooms and in the field to deliver education programs and professional development experiences to engage students and teachers in food and fibre.

IN THE CLASSROOM: We deliver curriculum-aligned food and fibre programs for teachers and students.

IN THE FIELD: We run educational field trips showcasing primary production in action.

PD SESSIONS: We offer industry-backed professional development sessions.

TAILORED CAMPAIGNS: We can plan and deliver bespoke education opportunities for all ages and experiences in food and fibre.

INSPIRING PROGRAMS: This year we are offering the Science Investigation Awards, the Lead Ag Teacher service, the Urrbrae Agricultural High School Animal, Vet and Agricultural Careers Expo and the SA Ag Careers Hub program.

Murray River Study Hub

The Murray River Study Hub provides opportunities for regional students to pursue tertiary education and VET alternatives without having to travel or relocate outside of the region. The Study Hub can assist in helping students to find the right course allowing school leavers, current/previous university students and mature aged students the flexibility to choose from a range of courses and modes of study. The Study Hub has campuses in Murray Bridge and Berri co-located at TAFE SA campuses. The Study Hub also has a local student advisor, based at each hubs who will provide support through a student's online learning journey. The Student Hub means students do not necessarily have move or travel to the city to study.

SA Government: Vocational Education & Training (VET) for schools

The South Australian Government's Vocational Education and Training (VET) program for school students brings industry and schools together to enhance career education and improve outcomes for students and employers. This program clearly articulates flexible industry pathways to employment in key growth industries in South Australia. These pathways map out a student's journey through secondary school to employment via career education, industry immersion, school-based apprenticeships, traineeships and formal qualifications.

Each pathway provides an industry-endorsed conduit to employment; better preparing young people for real-world jobs and providing a pipeline of young skilled workers for South Australia's growing industry sectors. These pathways include VET qualifications at Certificate II and III level.

They also include enterprise and employability skills training delivered through SACE and any specific industry requirements linked to the pathway. Importantly, the pathways include compulsory SACE subjects and contextualised delivery of other school subjects so that students can complete both a VET qualification and their SACE concurrently.

Students undertaking this program finish school with qualifications recognised by both the education system and industry. Students can also gain credit towards Apprenticeships and Traineeships – both school based and part time.

Students are able to experience a range of pathways including, but not limited to:

- Agriculture
- Aquaculture
- Conservation and Land Management
- Forestry
- Horticulture

VET courses can lead to further study at TAFE or University (including adding to an ATAR score) and/or directly into employment.

<https://www.education.sa.gov.au/schools-and-educators/curriculum-and-teaching/pathways-further-education-and-employment>

KEYWORDS: VET, apprenticeship, traineeship, school, SACE

VET: Scholarships

Schools, universities and other educational institutions offer scholarships based on various criteria. These may be merit-based or relate to the students cultural or social background. External institutions and benefactors also fund needs-based or career scholarships.

The Australian Government Department of Employment and Workplace Relations (DEWR) provides scholarships for young Australians from select regions to undertake an eligible VET qualification.

GRANTassist: <https://www.grantassist.sa.gov.au/community/>

VET: Regional Student Pathways Alliances

Increasingly, more High Schools offer “Agriculture as a core focus”, and are participating in and being supported by the SA Ag Careers Hub program. In some regions groups of member schools work together to provide VET opportunities for their students, incorporating Trade Training Centre’s, structured workplace learning, work experience and school-based apprenticeships.

Students from member schools in a region have priority in being placed in courses, however students from non-member schools can apply to do courses. (Interested students should contact their school VET Coordinator).

- Murray Mallee: <https://www.mbhs.sa.edu.au/murraylands-student-pathways>
- Northern Adelaide: <http://www.nasssa.com.au/>

Some schools offer VET programs on their own:

- Balaklava High School: <https://www.balakhs.sa.edu.au/vocational-education>

KEYWORDS: VET, Adelaide Hills, Murray Mallee, Balaklava, Northern Adelaide, regional

SA Government: Student Pathways

The South Australian (SA) Government Student Pathways website is a resource for students, parents and teachers; taking students from school to employment. This resource allows students to explore career and study options, connect with employers and employment opportunities and build their Curriculum Vitae (CV).

The Student Pathways website also encourages students to take up opportunities for self-led career exploration and workplace exposure through the World of Work (WOW) Challenge. The WOW challenge rewards students when they reach 50 hours and 100 hours of work exposure including the likes of:

- school-based apprenticeship and traineeship opportunities
- work experience
- industry expos, career events, conferences or open days
- design challenges or other competitions

The Student Pathways program also assists employers to promote their business or industry directly to students, post opportunities, connect with schools through the creation of Industry and Employer Immersion program and the opportunity to create specific industry and employer immersion activities such as:

- providing guest speakers, mentoring or mock interview programs to schools,
- hosting industry site tours and visits,
- creating an industry challenge,
- offering professional development for teachers
- promoting industry conferences or expos,

Ironwood Institute

Ironwood Institute, based in Adelaide and established in 2009, is a private institute delivering nationally recognised agribusiness and horticulture courses to Australian and international students. Ranging from Certificate III to Graduate Diploma, with pathways to universities, the training Ironwood Institute deliver can help students to gain employment, go on to further study, and/or upgrade their skills. The Ironwood Institute provides students with knowledge and 'hands-on' practical experience.

Along with AHC31120 Certificate III in Nursery Operations, Ironwood Institute delivers the following nationally accredited courses:

- **AMP80215 Graduate Diploma of Agribusiness**

Ironwood Institute is the only independent provider of the Graduate Diploma of Agribusiness in South Australia. This one-year qualification provides academic outcomes at AQF level 8 in agribusiness and reflects the role of people who apply specialised knowledge and skills to the senior managerial and leadership role in an organisation or business area. The Graduate Diploma can be packaged as the first year of one of six Master's degrees at either The University of Adelaide, the University of New England, or Torrens University.

<https://ironwood.edu.au/university-pathways/>.

- **AHC50422 Diploma of Horticulture Management**

Ironwood Institute offers this one-year full-time study course to provide the skills for people who manage horticultural enterprises where a range of skills and knowledge across the breadth of the industry is required or personnel working in horticulture at a level requiring higher technical skills. Available for subsidies training for students on a traineeship.

<https://ironwood.edu.au/courses/diploma-of-horticulture-domestic/>

- **HC30722 Certificate III in Horticulture**

A career in horticulture means you will meaningfully contribute to creating liveable cities, and healthy environments and protecting the future of food security in Australia. The career path is only limited by your interests and motivation, many learning pathways can be taken. This one-year full-time program includes classroom and practical training and assessment to develop skills and knowledge in crop/plant selection, cultivation, management of soil, irrigation, fertilizers, weeds, control of pests and diseases, handling of chemicals, and work health and safety procedures (WHS).

<https://ironwood.edu.au/courses/certificate-iii-in-horticulture-domestic/>

- **AHC33719 Certificate III in Protected Horticulture**

Ironwood Institute offers this one-year full-time study course to provide skills for people who work in the protected horticulture industry undertaking work in the areas of picking, packing, crop, and nursery work. Individuals learn a broad range of skills in selecting and operating equipment, coordinating resources, and applying contingency measures during work.

River Murray Youth Council (RMYC)

The River Murray Youth Council (RMYC) provides an opportunity for students in years 7-12 to develop leadership skills, gain a deeper understanding of the surrounding landscapes and play a hands-on role in conserving and caring for our unique environment. THE RMYC has both a Riverland group and a Murraylands group who meet regularly to share ideas and experiences.

The program offers involvement in environmental activities, field trips and projects, project management activities and eligibility for additional SACE credits. This program also provides students with exposure to community and landcare groups, landscape board staff and other partners. Involvement in the RMYC will provides students with a better understanding of career options and pathways and work experience opportunities.

School Wether Challenge (AWI)

The School Merino Wether Challenge is an annual competition organised by the NSW Stud Merino Breeders' Association in NSW, SA Stud Merino Sheepbreeders Association in South Australia and in Western Australia by the Stud Merino Breeders Association of Western Australia, all with support from AWI.

The initiative aims to educate and engage students on the commercial production of Merino sheep by giving them a memorable 'hands on' experience covering a broad range of sheep and wool production skills.

CSIRO Virtual Work Experience opportunities

In 2023, the CSIRO virtual work experience program will support students to undertake work experience remotely, providing opportunities for those who may face geographic or other barriers to participating in traditional work experience.

Virtual work experience allows you to undertake collaborative, group science, technology, engineering and maths (STEM) projects, including projects linked to real-world CSIRO research and industry challenges. Experienced CSIRO staff will supervise groups of students remotely using a secure online platform.

To be eligible to do virtual work experience with CSIRO, students must be:

- in year 10 or 11 for the duration of the work experience, and enrolled in a school in Australia
- able to commit to a designated week between February and December 2023
- be supported by a teacher, parent or other approved adult in their physical location throughout their work experience project.

KEYWORDS: School, work experience

Postgraduate Studies

University of Adelaide: The Centre for Global Food and Resources (CGFAR)

The University of Adelaide postgraduate study in agribusiness

The University of Adelaide's Centre for Global Food and Resources has a worldwide reputation for creating and applying knowledge on secure and resilient global food and resource systems. Study the following courses to develop the necessary practical research, advisory and business skills for a rewarding career in the food and agriculture related industries. This is a great opportunity to become a leader in one of Australia's largest and most valued industries, with up to 6 job openings per graduate.

- Master of Agribusiness,
- Graduate Diploma of Agribusiness,
- Masters of Global Food and Agricultural Business,
- Graduate Diploma of Global Food and Agricultural Business,
- Graduate Certificate of Global Food and Agricultural Business,
- Professional Certificate of Global Food and Agricultural Business.

<https://www.adelaide.edu.au/global-food/>

KEYWORDS: Global, practical research, advisory skills, business, agribusiness, food

University of Adelaide: The Centre for Global Food and Resources (CGFAR)

The Centre for Global Food and Resources PhD program

The PhD program in the Centre for Global Food and Resources is a research-focused PhD with topics typically related to economics, business and policy issues affecting agricultural and food value chains, including smallholder producers in less developed countries to food consumers in Australia. Scholarships are available.

<https://www.adelaide.edu.au/global-food/study/phd-in-global-food-studies>

KEYWORDS: PhD, scholarships, economics, business, policy, food value chains, developing countries

University of Adelaide

Master of Teaching (Secondary)

The Master of Teaching offers the opportunity to build advanced research skills and improve career prospects. This degree is accredited by the Teachers Registration Board of South Australia. Graduates may register to teach in South Australia, and in most cases, interstate and overseas.

This program offers:

- courses on contemporary educational issues and social contexts,
- increased understandings of adolescent behaviour, learning and motivation,
- learn to support student wellbeing and positive student-teacher relationships,
- supervised teaching blocks in South Australian schools, and a practice-based research project.

KEYWORDS: Education, research, career pathway

University of New England (UNE): Agricultural Consulting and Farm Management

Agricultural Consulting and Farm Management can be studied at UNE through a specific unit - CSLT 402/502 Client Service Skills for Agricultural Consultants.

This unit is for people who work, or plan to work, in farm management, agricultural consulting/extension/advisory roles or other jobs that require professional farm management knowledge and is applicable to all agricultural sectors.

This distance education unit suits professionals already working and is a core unit for the Graduate Certificate in Agriculture (Agricultural Consulting).

<https://www.une.edu.au/about-une/faculty-of-science-agriculture-business-and-law/school-of-environmental-and-rural-science/study-areas/agconsult>

KEYWORDS: Farm management, agriculture, consulting, professional development

University of New England (UNE): Master of Science in Agriculture

UNE's Master of Science (Agriculture) allows students steer their studies towards their own interests and career direction within the broad areas of animal science; meat science and technology; wool science; genetics and animal breeding; agronomy and soil science.

Students are able to choose from a wide range of units, covering all aspects of the agricultural industry and receive a comprehensive introduction to research skills and research methodology. There is the option of undertaking a research project.

Students will have access to the latest agricultural technology and techniques at UNE's innovative SMART Farm which including their production feedlot at Tallimba, with the choice to study on campus or online. The takes 1 to 2 years full-time or up to 6 years part-time.

<https://www.une.edu.au/study/courses/master-of-science-in-agriculture>

KEYWORDS: Flexible study, Armidale, Tallimba, livestock, agronomy, technology, soils

University of New England (UNE): Graduate Certificate in Agriculture (Agricultural Consulting)

This Certificate provides two distinct modules for agricultural consultants to assist their clients' businesses or for farm managers to run their own business. The first module covers Whole of Enterprise Planning, including farm resources, production and finances. The second module improves the skill of the consultant or farm managers in respect to communication tools, facilitation and negotiation.

Students will develop the key proficiencies including skills in farm planning profitability and financial analysis; benchmarking; systems analysis; setting and assessing enterprise goals; resource allocation; managing risk and succession planning.

<https://www.une.edu.au/about-une/faculty-of-science-agriculture-business-and-law/school-of-environmental-and-rural-science/study-areas/agconsult>

KEYWORDS: Management, production, finance, planning, analysis, resource allocation, consultants

University of New England: Master of Science in Applied Nutrition

UNE Online offers this 36-credit Master of Science in Applied Nutrition, 100% online with timely, relevant classes and optional focus areas for professionals looking to advance their careers.

All students take the six core courses of the curriculum, and then each student is able to select their own five electives and one capstone to complete the Master of Science in Applied Nutrition degree.

The Master of Science in Applied Nutrition will prepare individuals for leadership roles in the nutrition field, advance knowledge and expand skills, promote excellence and innovation and emphasize evidence-based best practices to support the well-being and health outcomes of individuals, families, and communities through education, research, and service.

<https://online.une.edu/applied-nutrition/>

KEYWORDS: Nutrition, online, career pathway, health

Industry-engaged HDR programs at the University of Adelaide

The University of Adelaide aspires to prepare its graduate researchers for diverse roles and opportunities across all sectors and build a community of future makers. Industry engagement as part of a higher degree by research program provides unique opportunities and a strong complement to academic studies and gives students a head start in future employment opportunities.

By undertaking an industry engaged HDR program at the University of Adelaide students will have the opportunity to collaborate with industry leaders to design innovative research projects that address real-world problems. Students will connect with an experienced industry mentor across the duration of their degree and have the opportunity to develop their research skills and sector business knowledge through a research internship. Moreover, students will undertake career-specific training and professional development through the Adelaide Graduate Research School's Career and Research Skills Training program.

KEYWORDS: PhD, travel, agriculture, natural resource management

Australian Plant Phenomics Facility (APPF): Postgraduate Internship Awards

The APPF offers grants to postgraduate students to provide access to the facility's cutting-edge phenotyping capabilities to undertake collaborative projects. Students will work as an intern with the APPF team learning about experimental design, and image and data analysis in plant phenomics.

Priority research areas include tolerance to abiotic stress, improving resource use efficiency in plants, statistics and biometry, the application of mechatronic engineering to plant phenotyping and also the application of image analysis techniques to understanding plant form and function. The level of support depends on the nature and duration of the project but supports up to a maximum of \$10,000 towards infrastructure use and may also include travel support.

<https://www.plantphenomics.org.au/education/>

KEYWORDS: Plant phenomics, plant biology, internship, lab work, engineering

Playford Trust Scholarships and Awards

The Playford Memorial Trust supports high-achieving South Australian students working in areas of strategic importance to the State. In 2023, the Trust and its partners, across a variety of sectors, will provide more than \$750,000 in scholarships, internships and awards to university undergraduates, Honours, Masters and PhD students, as well as to students at varying levels of TAFE. Specific scholarships and awards include:

- Playford Trust/Clean Seas Scholarship – 3rd year in aquaculture
- Playford Trust/Coopers Brewery Honours Scholarship
- Playford Trust Honours Scholarships
- Playford Trust PhD Scholarships
- Playford Trust/Defence Science & Technology Group PhD Scholarships
- Playford Trust TAFE Awards

BUILD YOUR CAREER IN PASTURE RESEARCH

\$8000 one-year Research Project Scholarship for Honours and Masters students

\$15,000 p.a. AW Howard Pasture Research fellowship

\$10,000 p.a. Tim Healy Memorial Scholarship

\$15,000 early-career research grants

Scan to visit website!

The AW Howard Memorial Trust is a not-for-profit association established to commemorate Amos Howard, grandfather of subterranean clover in Australia.

Its awards encourage and promote research into the development, management and use of pastures.

The AW Howard Memorial Trust Inc.

SUPPORTING RESEARCH ON AUSTRALIAN PASTURES AND GRASSLANDS

Tim Healey Memorial Scholarship

The Future Farm Industries Cooperative Research Centre (CRC) Board established the scholarship in 2013. It represents their commitment to ongoing development of Australia's farming systems and is a fitting legacy in memory of Dr Tim Healey's contribution to this effort. A sub-committee of the AW Howard Memorial Trust administers the program and may award the Tim Healey Memorial Scholarship annually. The post-graduate student must be studying in a field that benefits the future of Australian farming such as: Pastures, livestock management, farming systems, agronomy, farm business management, woody crops, on-farm biodiversity or socio-economic aspects of farming.

The recipient must:

- Currently hold, or have been approved for, an existing base scholarship (such as an Australian Government Research Training Program Scholarship (RTPS), formerly Australian Postgraduate Award (APA)), or an industry-based fund of similar merit.
- Have also been accepted in an appropriate full-time Higher Degree by Research program at a recognised Australian university and met the selection criteria.

The successful applicant will receive a top-up scholarship of \$10,000 per year, regardless of the value or existence of a student's base scholarship, for a maximum of 3.5 years.

AW Howard Memorial Trust Research Fellowship

The AW Howard Memorial Trust Research Fellowship is awarded annually on a competitive basis and applications are open to postgraduate students enrolled at or intending to enrol at an Australian University. The Trust awards the Research Fellowship to an outstanding candidate currently undertaking or intending to undertake post-graduate pasture research.

The Research Fellowship is:

- Paid as a stipend of \$50,000 annually,
- For a period of up to 3.5 years,
- Dependent on an annual evaluation of continued satisfactory performance.

The Trust encourages applications from students with qualifications in Agricultural Science, Natural Resource Management, Agricultural Economics or Social Science. The current or approved Masters or Doctorate degree must be relevant to pasture management, development or use, and the objectives of the Trust.

KEYWORDS: Pasture, research, agricultural science, natural resource management, economics, social science

The Gary Sansom Scholarship

The Gary Sansom Scholarship aims to uncover future chicken meat industry supporters and leaders, providing funding and support to help students make their mark on the industry right from the beginning. The scholarship seeks to identify high quality students, foster a career pathway in the chicken meat industry and support industry relevant research.

Each scholar is provided with support and opportunities including a stipend for living expenses, attendance at poultry industry conferences, an industry supervisor to provide career support and insights in addition to their existing academic supervisor and networking opportunities. In addition, students must be willing to have a member of the Australian chicken meat industry as a supervisor and have a desire to contribute to the Australian chicken meat industry in the long term.

<https://www.agrifutures.com.au/people-leadership/scholarships/gary-sansom-scholarship/>

KEYWORDS: Poultry, chicken industry, research, scholarship

Fight Food Waste CRC

The Fight Food Waste Cooperative Research Centre (CRC) was established in 2018 to help Australia combat food waste and is now the largest dedicated food waste research and development organisation in the world. There are opportunities for Master's and PhD students to take part in the CRC's education program, with SA based opportunities through the University of Adelaide and SARDI. The 2 year are valued at \$50,000 whilst top-up scholarships valued at up to \$100,000 are available for 4-year PhD students to supplement the base scholarship from a participating university. Additionally, Fight Food Waste CRC postgraduate students are part of the Future Leaders Program; a personal and professional development program including training, retreats and networking opportunities.

KEYWORDS: Masters, PhD, scholarship, professional development, sustainability, networking

Yitpi Foundation Research Awards and Grants-in-Aid

Yitpi is a Kurna word for seed or soul.

The Yitpi Foundation has been established to encourage and promote research and education in three main areas:

- Crop science, particularly in relation to the wheat industry in Southern Australia.
- Social science in linguistics of Australian languages.
- Studies of cultures of Australian Aborigines, particularly in relation to land usage.

Awards or grants (up to \$15,000) are made twice yearly (April and August) in the three areas. Applications will be accepted until 5 June 2023 and must be clearly marked for the Yitpi Foundation.

Richard Brownrigg richard@clarbrow.com.au CC to: Jane Rathjen jane.rathjen01@gmail.com

KEYWORDS: Research, crop science, linguistics, Indigenous, culture

JR Barker Scholarship

This scholarship is available to students undertaking research in connection with primary production in South Australia (more particularly in the livestock and wool industries). One scholarship is available to a full-time student enrolled in an Honours program undertaking a relevant research project.

Applicants must be Australian or New Zealand Citizens or permanent residents of Australia undertaking study as a Commonwealth supported student and must remain enrolled on a full-time basis in the program for which the Scholarship was approved. Selection of the successful candidate will be made according to academic merit and relevant research.

The Scholarship must be taken up in the year in which it is offered and cannot be deferred. Students in receipt of other University of Adelaide Scholarships may apply for this scholarship.

<https://scholarships.adelaide.edu.au/Scholarships/honours/faculty-of-sciences/jr-barker-scholarship>

KEYWORDS: Primary production, livestock, wool, research, full-time

The Ranson Mortlock Scholarships

These scholarships support students who are undertaking Honours projects relevant to soil erosion and the regeneration of pastoral land at the University of Adelaide.

Applicants must be Australian or New Zealand citizens or permanent residents of Australia undertaking study as a Commonwealth supported student and must remain enrolled on a full-time basis in the approved program for which the scholarship was approved. Selection of the successful candidates will be made according to academic merit, potential benefit and research relevance. Students in receipt of other University of Adelaide Scholarships may apply for this Scholarship.

APL Honours Scholarship

APL supports undergraduate honours scholarships within an area of research aligned to the APL strategic plan.

Undergraduate scholarships are only for one year with a maximum of \$5,000 stipend and \$5,000 operating costs.

Students are encouraged to first talk to the relevant person at their university or institution who has research interests in the pork industry.

<https://australianpork.com.au/industry-scholarships>

KEYWORDS: Research, pork industry

APL Pork / Pig Industry Post-graduate scholarship

The award facilitates research within areas of importance to the Australian pork industry with preference will be given to applicants who:

- are looking to study within research areas linked to the Strategic Plan 2020-2025,
- are conducting research in an existing APL project,
- have a high calibre academic record with references,
- have experience within the pork industry and/or some undergraduate experience in research.

Students are encouraged to first talk to the relevant person at their institution who has research interests in the pork industry and to apply for an Australian Postgraduate Award (APA). If successful in obtaining an APA, an APL supported student can then apply for an APL top-up scholarship.

<https://australianpork.com.au/industry-scholarships>

KEYWORDS: Research, pork industry

Meat & Livestock Australia (MLA)

Meat & Livestock Australia Limited (MLA) is a producer-owned company that provides world class services and solutions to the entire red meat industry. The purpose of MLA is to foster the long-term prosperity of the Australian red meat and livestock industry and envisages being a leader in delivering world-class research, development and marketing outcomes.

MLA collaborates with stakeholders to invest in research, development and marketing initiatives which will contribute to producer profitability, sustainability and global competitiveness.

MLA supports the bridge from education to agricultural research through its postgraduate program, postdoctoral program and various scholarships. Numerous students have been supported through MLA and its predecessor organisations since 1975.

<https://www.mla.com.au/about-mla/mla-at-a-glance/>

KEYWORDS: Red meat, livestock, research, development, education, students

MLA: Scholarships

The MLA scholarship program supports students undertaking postgraduate studies (mostly PhDs) for up to three years of their candidature. Students receive a stipend higher than Australian Postgraduate Award stipends and also support for project costs.

Student projects are varied and cover a wide range of industry-related topics including all areas of interest in MLA's livestock production R&D programs. Many students supported by this scheme are working within these funded research programs, others work on projects independent to MLA.

Upon completion of their studies, more than 70% of students supported by this scheme continue to work within the red meat and livestock industry and a significant proportion go on to play important leadership roles in agricultural and livestock industries.

<https://www.mla.com.au/Research-and-development/Funding-opportunities/Students>

KEYWORDS: Red meat, livestock, research, development

MLA: Postgraduate Study Awards

Each year, MLA makes available a number of awards tenable at Australian and potentially overseas universities or institutions for postgraduate study. The awards facilitate research and training in areas of practical value to the Australian beef, sheep-meat and goat-meat industries.

MLA will provide student networking, training activities and mentoring to support the development of student research capability. MLA also supports a range of other programs including Nuffield scholarship, MINTRAC postgraduate studentships, Australian Rural Leadership Foundation and Masters of Animal Science (Animal Breeding Management).

<https://www.mla.com.au/Research-and-development/Funding-opportunities/Students>

KEYWORDS: Red meat, beef, sheep, goat, scholarship, postgraduate program, postdoctoral program

Science and Innovation Awards grants

The Science and Innovation Awards for Young People in Agriculture, Fisheries and Forestry supports people aged between 18 and 35 to pursue innovative scientific research projects that will deliver long-term benefits to Australia's rural industries. This open, competitive, annual grant program is a great opportunity to kick-start a research career and build industry networks.

Applicants must be working or studying in an agriculture, fisheries or forestry-related industry - and planning to undertake a project that will contribute to the ongoing success and sustainability of one of those industries. There are grants of up to \$22,000 across a range of award categories, with the overall Minister for Agriculture, Fisheries and Forestry Award providing additional project funding. Many of the research and development corporations sponsor an award category.

Crawford Fund International Student Awards

The Crawford Fund encourages young scientists to become engaged in international agricultural research particularly with developing countries. It has been shown that scientists in Australia having an association with the international scene develop projects which have an economic benefit for both Australia and our International partners. To help young scientist develop international connections the Fund provides a number of opportunities to become involved ie:

- Scholarships, for scientists under 35 years of age, that provide a fully funded opportunity to attend the annual Crawford Fund Conference held in Canberra, usually in Parliament House and a scholars program.
- Studentships for post graduate students to fund an opportunity to include an overseas experience as part of their post graduate studies.
- Joining the Researchers in Agriculture for International Development (RAID) network.
- Volunteering by joining the Australian Volunteers Program.

<https://www.crawfordfund.org/awards/crawford-fund-student-awards/>

KEYWORDS: Under 35 years old, science, international research, international, scholarships, studentships

Early-Mid Career Professional Development

AgriFutures Rural Women's Acceleration Grant

AgriFutures has introduced a new program called the AgriFutures Rural Women's Acceleration Grant program. It will run separately, however it will complement the Rural Women's Award process, aiming to provide a leadership and development opportunity to women who are not yet ready to apply for the Award. Seven Australian women per annum will be granted with a learning and development bursary (not cash) of up to \$7,000 for professional development to enable them to bring their idea, cause or vision to life.

Who Can Apply

- Applicants need to be over 18 years old and identify as female.
- Applicants must have an idea, cause or vision (not yet realised) which aligns with one or more of three categories: Community, Collaboration, Commercial.
- Idea or vision will have a positive impact on rural or emerging industries, businesses or communities.

<https://agrifutures.com.au/opportunities/acceleration-grant/>

KEYWORDS: Women, bursary, leadership, community, collaboration, commercial, rural/emerging industries

Industry Leaders Fund education scholarship

The Industry Leaders Fund (ILF) helps those with industry leadership potential and aspirations to achieve their aims. Successful recipients receive up to \$50,000 to develop leadership skills, experience and knowledge through education, and/or training at best practice work places.

ILF supports individuals who can demonstrate:

- Leadership potential, interest and abilities through employment history and/or the broader community,
- Interest in sharing the benefit of their talents, knowledge and achievements with the industry in which they work and the community in which they live.

<https://industryleaders.com.au>

KEYWORDS: Leadership, best practice, community, scholarship

The Zanda McDonald Award

People who are making a difference in agriculture, who are passionate about what they do and are keen to further develop their skills should consider applying for the Zanda McDonald Award. This award recognises determined and passionate young Kiwis and Aussies and may assist in faster career advancement. Applications for the Award open each year from 1 - 31 August. The award includes:

- A fully personalised mentoring trip across both Australia and New Zealand, spending time with leaders and mentors across all areas of the primary sector, with travel and accommodation expenses covered.
- A personalised education or training package, up to the value of \$10,000,
- A one-on-one visit from an industry mentor to spend a day at the Award recipient's workplace, and more!

<https://www.zandamcdonaldaward.com/>

KEYWORDS: 21-35 year olds, Australia, New Zealand, travel, mentoring, training

The Agricultural Extension Industry

Agricultural extension uses the results of social science research to encourage the adoption of new technical research. It involves working with the 'whole farm' and ensures the 'human element' is considered in the delivery of projects.

Effective agricultural extension professionals use a range of skills including change management, communication, project and event management, teaching and facilitation to be successful in their roles.

Agricultural Extension professionals often work with groups of landholders, allowing change to be facilitated across the whole farm or landscape, rather than just one paddock.

Agricultural Extension is also an on-going process with relationships forming over a much longer time, allowing for the provision of on-going support as the farm business adopts/implements new technologies or tools.

There are a number of extension roles existing including Extension Officer, Industry Development Officer, Landholder Liaison Officer, Sustainable Agriculture Officer, Communications Officer, Animal Health Officer, Project Officer/Manager, Trials Agronomist and Biosecurity Officer.

There are several ways in which to enter the agricultural extension industry. Most agricultural extension professionals have started jobs within the State Department of Agriculture, NRM boards, grower groups, or as project officers for industry bodies. However, any graduate role within agriculture will lead you into the agricultural extension industry.

There are a number of short courses available to build skills in agricultural extension and these include:

- AgInnovate, 90-minute extension micro-courses:
www.aginnovate.com.au
- University of Melbourne, People & Change in Agriculture MicroCert:
<https://study.unimelb.edu.au/find/microcredentials/people-and-change-in-agriculture/>

The following industry organisations and platforms are available to build and share knowledge of agricultural extension:

- The Australian Pacific Extension Network (APEN) www.apen.org.au
- AgExcellence Alliance www.agex.org.au
- ExtensionAUS www.extensionaus.com.au

KEYWORDS: Change, communication, project management, event management, facilitation

Do you want to work with farmers or
rural land holders?
Or present agricultural research to
farmers?

The why not join in with our

2022 Extension Micro-Courses

These 90-minute online workshops will give you a head start in your agricultural extension career. They will introduce you to how farmers learn, how change happens, how to engage with farmers, plus lots more. Formal qualifications available.

Nuffield Australia: Scholarships for primary producers

Applications for 2024 scholarships open March 2023. There are approximately 20 scholarships on offer annually, each valued at \$30,000. Farmers with a desire to drive their knowledge and businesses forward are urged to apply.

Benefits of the program include access to a global network, identification of best practices and building capacity. After the study, scholars produce a written report and communicate the new knowledge and experience to others in the industry.

A Nuffield Scholar will:

- Research a topic to add value to the Australian primary industry sector,
- Become a member and join a global network of Scholars to promote primary industries,
- Have access to international businesses and individuals through the global Nuffield network.

<https://www.nuffield.com.au/>

KEYWORDS: Networking, best practice, capacity, primary production

Winston Churchill Memorial Trust (known as 'Churchill Fellowships')

The aim of the Trust is to provide an opportunity to Australians to travel overseas to explore a topic or issue that they are passionate about in their chosen field (which does include all forms of agriculture and natural resource management). It also aims to reward individuals who possess passion and a commitment to make a difference in Australian society.

There are no prescribed qualifications to apply provided benefit to Australia is evident and a willingness to share your findings with the Australian community is displayed. Applications are encouraged from Australian citizens from all sectors of the community and in any field or topic of interest.

Applicants are empowered to design their own projects to explore international best practice and innovation that can be applied in Australia.

<https://www.churchilltrust.com.au/become-a-fellow/>

KEYWORDS: Best practice, innovation, fellowship, agriculture, natural resource management

Australian Institute of Company Directors: Company Directors Course

The Australian Institute of Company Directors (AICD) Directors Course is essential learning for directors seeking to establish themselves in their career as a trusted and respected board member.

The course is designed for directors from a diverse range of industries and organisations and is ideal for those looking to understand director roles and responsibilities in-depth.

The AICD's scholarship program provides promising and emerging directors the opportunity to participate in world-class courses and develop their director careers. Applications from both members and non-members.

KEYWORDS: Research, agriculture, international development, prize, professional development

Marcus Oldham Rural Leadership Program

The Marcus Oldham Rural Leadership Program, supported by NAB Agribusiness, is an intensive five-day workshop conducted on the college campus at Geelong. The industries represented include livestock grazing for meat and fibre, broad acre summer and winter cropping, dairy production, poppy production, cotton production, horticulture, apiary and a range of agribusiness support businesses. The program will develop the skills and knowledge of participants to enable them to:

- undertake a leadership role in their industry or community
- competently represent their industry or community in decision-making forums
- understand and address the issues facing rural industries and rural communities

KEYWORDS: Leadership professional development, networking, challenge-based, problem solving

Australian Agribusiness Leaders Program

The Australian Agribusiness Leadership Program is a bespoke 11-day development program for agribusiness leaders. It initiates structured pathways for agribusiness leaders wanting to have a positive impact and invest in leadership capability within the sector, fostering collaboration between organisations and cultivating new ideas.

<https://rural-leaders.org.au/national-leadership-programs/agribusiness-leadership/>

KEYWORDS: Leadership, professional development, networking, agribusiness, collaboration

TRAIL Emerging leaders

The TRAIL Emerging Leaders program is a cross-sector, challenge-based 7-day leadership program. The program gives emerging leaders an understanding of fundamental practices for collaborative and adaptive leadership. Through experiential and challenged-based learning, emerging leaders become aware of personal behaviours and learn how to engage more effectively in their workplace, community, and industry. Participants are able to explore strategies to address complex situations.

The program includes a challenging four-day outdoor experience, numerous workshops and panel sessions and is suited to diverse people for different occupations, communities and backgrounds.

Applications are currently full for 2023. Enquires for the 2024 program should be made via email.

<https://rural-leaders.org.au/national-leadership-programs/trail-emerging-leaders/partnerships@rural-leaders.org.au>

KEYWORDS: Leadership, networking, communication, outdoor

Milparanga Aboriginal and Torres Strait Islander Leadership Program

Milparanga Emerging is an 8-day leadership development program for Aboriginal and Torres Strait Islander People (21 years and older) in the early stages of leadership.

Milparanga is an immersive and culturally safe experience. Participants can expect to hear stories from Indigenous leaders, visit culturally significant sites to learn about Indigenous history and legacies and meet and hear stories from Milparanga alumni. Milparanga Emerging Leadership involves outdoor activities and participants can expect to be pushed outside of their comfort zone. Being taken by surprise is part of the experience. Some scholarship places may be offered although applications for the program are currently closed.

<https://rural-leaders.org.au/national-leadership-programs/milparanga/>

KEYWORDS: Indigenous, Torres Strait Islander People, outdoor, leadership

Future Drought Resilience Leaders Program

Drought Resilience Leaders Development is a leadership development program to prepare 12 agricultural communities for the impacts of future drought and climate change. It is suitable for people living in these communities who are interested in building long-term drought resilience, developing leadership skills and becoming better communicators within their families and communities.

The activities on this program provide an understanding of leadership as a practice and how participants can work with others to achieve better outcomes and solve problems. The activities may test participants resilience and collaboration skills, leading to participants becoming equipped with the skills to manage these situations. All activities are based on scenarios specific to the participants region. Participants will learn how to collaborate with others and those with opposing opinions.

KEYWORDS: Program, leadership, mentoring, networking, women

National Agricultural Leadership Program

The National Agricultural Leadership Program (NALP) is an annual leadership program for young and emerging leaders in agriculture. It builds leadership skills and provides direct experience in policy development, advocacy, governance and communications and media.

The NALP has four components:

1. Leadership Workshop – three-day intensive workshop in Canberra, meeting with key stakeholders in agriculture including, federal politicians, government departments, media and private sector lobbyists.
2. Policy Project – experience researching and developing a new policy on a key issue facing agriculture.
3. Inspiring Speakers Webinars – webinars from leaders in agriculture discussing their leadership journey.
4. Mentoring Program – specific mentoring to support ongoing leadership and development.

The program usually commences in March with registration of interest occurring in January.

KEYWORDS: Program, leadership, policy, advocacy, governance, communications, media, networking

Awards

The Jim McColl AIA Young Consultant Award (South Australia)

Dr Jim McColl, who passed away in 2013, was one of the early pioneers of the private farm consulting movement. He specialised in a whole of farm approach, including business aspects and was highly regarded by clients and colleagues. The SA Division of Ag Institute Australia in which Jim spent much of his time, believes that it is fitting that his contribution to Australian agriculture be recognised in the long term. The Jim McColl AIA Young Consultant Award (SA) recognises the achievements of young consultants, an area in which Jim was passionate to assist in developing and one he would be proud to support.

Guidelines / Eligibility:

- Open to consultants - defined as those engaged in fee for service work. Such work may be one-on one service for clients, project development/management activity, or advice to larger entities on management,
- Applicants will be providing services to clients in South Australia but may be resident in another state,
- Age 40 or younger, with at least five years consulting experience and currently engaged in consulting,
- Do not have to be an AIA member.

Selection criteria: Based on merit of work, contribution to agriculture, must meet AIA ethics policy standards. The Award: A certificate and free AIA membership for 12 months, the awardee must provide a suitable paper for publication in the AIA Agricultural Science Journal and deliver a presentation at an AIA forum.

Agricultural Bureau
 of South Australia Inc.
PATHWAY TO IMPROVEMENT

Sustainable Agriculture Scholarship for Farmers (In memory of Peter and Wendy Olsen)

This scholarship aims to provide farmers (aged 18-40) in South Australia with the opportunity to improve personal and professional skills that would benefit their industry, their own business or employment and the sustainability of natural resources that underpin primary production.

The Scholarship may be used for study tours, courses or further study or assist to directly fund the commencement of a specific project.

The Scholarship is made possible from funding from the Department for Environment and Water (DEW) and offers an \$10,000 grant to the successful recipient. DEW is committed to supporting communities and industry to make decisions and take action to ensure the sustainable use of our natural resources.

The Scholarship is open to South Australian farmers (aged 18-40) who have been involved in primary production as their principal activity for the past 12 months

Selection of the recipient will be based upon the applicant's abilities, achievements and motivation to succeed in a primary production career (agriculture, horticulture, viticulture or aquaculture).

The recipient will need to demonstrate competency in a range of farming and interpersonal skills and will be expected to work within his/her chosen industry while holding The Scholarship.

Finalists will be selected and interviewed by the selection panel.

<https://www.agbureau.com.au/awards/sustainable-agriculture-scholarship>

KEYWORDS: Ages 18-40, professional development, sustainability, primary production

SA Rural Youth Bursary

This bursary aims to provide young people the opportunity to pursue further study, undertake a study tour or to develop a special project in their chosen career, which will ultimately benefit the rural community. The Bursary is open to all South Australians (aged 18-30) working in rural areas, in any capacity and not is restricted to primary production. The Bursary is made possible by funding from Primary Industries and Regions SA and offers a \$5,000 grant to the successful recipient. PIRSA is committed to growing primary industries and driving regional development.

Selection will be based upon the applicant's abilities, achievements and motivation to succeed in their chosen career. The recipient will need to demonstrate competency in their study, career and interpersonal skills and will be expected to work within his/her chosen career while holding The Bursary. They will also need to demonstrate how this will benefit their rural community. Finalists will then be selected and interviewed by the selection panel.

KEYWORDS: Leadership, networking, student, research, farming

Young Scientist Award

Animal Production Science (APS) offers a Young Scientist Award for the best oral or poster paper presented at the biennial conferences of the Association for the Advancement of Animal Breeding and Genetics (AAABG) and Australian Association of Animal Sciences (AAAS). The award carries a prize of a personal one-year print subscription to Animal Production Science, an AU\$250 book voucher from CSIRO Publishing and a certificate.

To be eligible, the first author must be not more than 10 years post-PhD, <35 years old and a member of the relevant society. Authors are to nominate a paper for consideration for the award. Nominations are then judged by the Executive Committee of the Society and an Editor. The winner of the award(s) will be announced at the conclusion of the conference and in an Editorial published in the journal.

<https://www.publish.csiro.au/an/forauthors/awardsandprizes>

KEYWORDS: Academic publication, animal breeding and genetics, animal sciences

Young Rural and Rural Ambassador Award

The Young Rural (16-19 years) and Rural Ambassador (20-30 years) Awards aim to highlight the importance of youth in rural South Australia and in particular, the agricultural show movement. The awards provide an opportunity for education and experience for young people and allows the development of closer links with primary industries. The Awards provide opportunities for passionate young people in rural and regional SA to promote their communities and to expand their thinking and horizons.

They offer all entrants additional training and personal development and introduce them to networks to further their careers, whether they be in agriculture, health, education, business, and service industries. Representatives are able to represent their show society at local, association, state and potentially national level.

KEYWORDS: Agriculture shows, youth, regional, rural, community, award

Competitions & Travel

AgXtra Crop Competition

The AgXtra Crop Competition is a small-scale simulation of a real life broadacre cropping scenario. This competition is for second-year students studying a Bachelor of Agricultural Science who are interested in applying their knowledge of broadacre cropping in a contest against university peers.

Students compete in small teams (4-6 students) and select a wheat variety and crop inputs. AgXtra will undertake the field operations; teams make the decisions. AgXtra will provide paddock location and history, standard soil test and Predicta-B results. Entries will be based on grain yield, quality and gross margin. Teams select: *Before Sowing* – variety, sowing rate, fertiliser to be applied at sowing and pre-emergent herbicide. *Mid-season (optional)* – fertiliser to be applied at either GS31 or GS37 and fungicide to be applied at GS39.

Steph Lunn

slunn@agxtra.com.au

KEYWORDS: Grain, broadacre, cropping, second year students, teams, decision making, agronomy

Crop Science Society of South Australia; Duncan Correll Travel Bursary

Members of CSSSA are invited to apply for a grant to attend conferences, field days, study tours or any other matter which will benefit the Crop Science Society. Awards are normally limited to \$1000 per year. Applications will be reviewed by the President and members of the Crop Science Society Travel sub-committee, (who are ineligible to apply while serving in this capacity).

Recipients of travel awards are required to provide a written report (including a two page summary of major findings) to the Crop Science Society committee within six weeks of returning from the event. Recipients are also asked to give a short presentation at a future Crop Science Society meeting. Applications should detail reasons for travel and benefits to the society. Applications can be forwarded to the secretary in writing and should be received at least two months prior to using the award.

<https://www.cropsciencesocietysa.com.au/awards-scholarships/>

KEYWORDS: Travel, conferences, field experience, report writing, presentation

Australian Association of Animal Sciences: International Travel Award

The Australian Association of Animal Sciences (AAAS) International Travel Award provides a general international grant to support the professional development of AAAS financial members through participation in international conferences, workshops, courses, research exchanges or study tours.

The International Travel Awards are conferred by the AAAS Federal Council who will grant up to two travel awards annually each up to a maximum of \$4000. The applicant must be studying or working in an animal science related field in Australia and AAAS would welcome applications from researchers, students, extension officers, consultants or producers. Applications for this award close on March 31st each year with awards normally made by the end of April.

KEYWORDS: Travel, animal science, study tour, international conferences, exchange

Angus Youth: Scholarships, Awards and Bursaries

Angus Australia is offering an expanded Scholarships, Awards and Bursaries program, aimed to increase member's knowledge of the Angus breed and also their understanding and experience of the Australian and International agricultural industries. Currently there are opportunities to attend conferences, forums, shows, regional and international study tours, the Tocal Beef Cattle Assessment School and take up industry cadetships with placements in leading agribusinesses. An annual research grant is also available for students undertaking study and research. To participate in the Angus Youth programs membership of Angus Australia is required (\$27.50 inc. p.a.) and applicants must be under 25. For more detailed information about what Angus Youth have to offer please see the subheadings below:

The Angus Roundup: The Angus Roundup is Australia's leading cattle shows and competitions for young people. The Roundup encourages those willing to learn about the beef industry, try their hand at junior judging and cattle parading while learning in a fun and light hearted atmosphere. Attendees will have access to leader demonstrators and speakers from across the supply chain. The Roundup is held in Jan – March 2024. Applicants to be between 8 – 25 years of age.

GenAngus Future Leaders Program: This program brings together 10 young Australian and 2 young New Zealand members for a 3-day intensive workshop to learn about marketing, succession planning, breeding and genetics, finance, benchmarking and the importance of mindset and culture in a work place. GenAngus is held from 30th May – 2nd June 2023 in Adelaide. Applicants to be between 18 – 40 years of age.

Regional Production Tours: This opportunity for a select group of young members involves an in-depth study tour of the South East Queensland industry with a special focus on breeding and genetics and their role in the broader beef supply chain. Applicants to be 18 – 40 years of age.

TransTasman Travel Bursary: This bursary is a 4 week self-guided tour of the New Zealand beef industry. Recipients will be able to embrace the differences in the New Zealand production system from paddock to plate and have access to some of the most innovative farmers and business in the world. Applicants are to be 18 – 25 years of age.

Industry Cadetships: are for those that are looking for a start in the agribusiness industry or looking to change direction. Cadetships are designed to give the applicant an understanding of the business and work required while the host company has the opportunity to assess the skills and attitude of the cadet to assess suitability for long term employment. Cadetships exist with Auctions Plus, NH Foods Australia and Achmea Australia. The successful applicants will also attend the Marcus Oldham Rural Leadership course as a finale to their placement. Applicants to be between 18 – 30 years of age.

Scholarships, Awards, Bursaries and Grants: are offered to attend conferences and training programs, or to access stipends for research and academia. The offering of scholarships varies from year to year therefore applicants are encouraged to visit the Angus Australia website for more information. Current offerings include, The National Angus Conference, The BeefEX Conference, The LivEX Forum and the Angus Foundation Research Grants. All of these Angus programs come with substantial funding opportunities for the successful recipients take part in the program.

KEYWORDS: Program, travel, farm tour, networking

Inter Collegiate Meat Judging (ICMJ) (July, Wagga Wagga)

The Intercollegiate Meat Judging Association (ICMJ) is a not-for-profit association which aims to provide an opportunity for students to learn and to build the pool of intelligent young meat industry representatives, fired with enthusiasm who will give the Australian meat industry the expertise and drive to compete in the meat quality world of the future.

ICMJ supports students by:

- Exposing students to the fundamentals of meat quality.
- Teach carcase specifications required in today's market.
- Provide training and guidance for personal development, while raising awareness of career opportunities.
- Create opportunities for students to apply their knowledge in practical setting.

The purpose of the ICMJ program has always been to attract graduates into the red meat industry. ICMJ's mission is to inspire and develop future professionals in the global red meat industry.

Conferences

Adelaide University Agricultural Student's Association

'Growing the Future' event

The annual premier event from the Adelaide University Agricultural Students' Association (AUASA) is a career's night with a difference. To be held on August 10th 2023 at the Adelaide Oval, this event is an opportunity for SA's young agriculturalists to connect over a three course meal, networking sessions and panels featuring a range of industry professionals.

Organised voluntarily by AUASA, the AgTech themed "Growing the Future 2022" attracted its largest crowd ever, of almost 280 attendees. They consisted of approximately 20 High School Students, several young farmers, 170 university students and 80 industry representatives.

<https://www.auasa.com/>

@AUASAdelaide

KEYWORDS: Youth, networking, career opportunities, university student, young farmers

SALRC: Livestock Conference and Young Ag Professional Bursaries

Southern Australia Livestock Research Council (SALRC) host a biennial Livestock Conference where the focus is on topical issues and trends impacting on successful livestock production businesses. The goal of the conference is to help Meat & Livestock Australia (MLA) determine new investment priorities by MLA in RD&A for the sheep meat and beef industries.

SALRC has identified the importance of involving younger producers, researchers and extension personnel to help shape conversations and plans to host young Ag industry professionals at future conferences. South Australia intends to support two Young Ag Professional Bursaries to the Livestock Conference.

<https://salrc.com.au>

KEYWORDS: Livestock, conference, sheep meat, beef industry, young Ag professionals

Conference of the Association for the Advancement of Animal Breeding and Genetics (AAABG)

AAABG extend an invitation to attend the 25th Conference, to be held on 26-28th July 2023. The conference will be a face-to-face event held in Perth at the University of Western Australia on Noongar land by the beautiful Derbarl Yerrigan (Swan River).

The theme of this year's conference is 'Animal Breeding at the Crossroads'. There will be the opportunity to reflect on the achievements of AAABG since the inaugural conference in 1979 and also to explore the role of animal breeding in a future with ever-increasing community concern for climate change, environmental impacts, animal welfare, and meat consumption. Participants will hear the latest advancements in animal-breeding research and development and learn how this development is being used by the livestock industry.

Grain Growers **INNOVATION GENERATION**

Learn from ag industry leaders, network with other young professionals and challenge the status quo

INNOVATION GENERATION

17-19 July 2023
Adelaide Convention Centre

innovationgeneration.com.au

@InnovGeneration
@Innovation.Generation
innovationgenerationconference

Students receive discounts on tickets!

GrainGrowers Innovation Generation 2023

Students wanting the opportunity to learn from ag industry leaders, network with other young professionals and to challenge the status quo should consider the #IG23. Innovation Generation is a conference for those aged 18-35 that provides a showcase for speakers with real-world experience. Participants are able to join discussions around farms of the future, collaboration, entrepreneurship, and maximising innovation. IG23 will be held on 17-19 July 2023, Adelaide Convention Centre, with discounted student tickets available.

KEYWORDS: Learning, networking, grain, innovation, ages 18-35

Meat & Livestock Australia: MeatUp Forums

MeatUp Forums provide an opportunity for beef, sheep and goat producers to learn something new, stay up-to-date with the latest on-farm research and technologies and meet others working in the red meat industry. Held predominantly throughout southern Australia (across NSW, SA, southern WA and south-west Queensland in 2021-23), these forums introduce producers to the outcomes of MLA research and development projects and the next steps to drive profitability and productivity on-farm. At MeatUp Forums, producers can:

- hear about the latest red meat research, development and adoption programs with a whole-farm and value chain focus
- interact with expert speakers, including leading producers, advisors and researchers
- access tools and insights – tailored to the needs and interests of producers in the local area.
- MeatUp Forums are an MLA initiative and are delivered by Pinion Advisory.

International Food and Agribusiness Management Association (IFAMA) World Conference

The IFAMA 2023 World Conference (17-20 June 2023) will be held in Christchurch, New Zealand and has the title "Transforming the global food and fibre system".

IFAMA aims to explore the challenges and opportunities that are emerging with the introduction of digitization and technology in the agri-food sector. We will examine the development of new and sustainable technologies that are crucial to mitigating environmental and climate challenges impacting the future of food. Such technologies are complex and often intertwined with new business models, value chains, industry standards and institutions.

As part of this year's world conference the Global Student Case Competition is available. The competition requires teams to work through a complex case study in four hours.

<https://www.ifama.org>

KEYWORDS: Digitization, technology, global, sustainability, environment, climate challenges, business

LambEx: Young Guns (Postponed for 2023)

The premise of LambEx Young Guns is to connect Australian sheep and lamb producers with city consumers to assist in bridging the city-country divide by increasing awareness and communication of the ethical and sustainable methods of Australia's sheep and lamb producers.

LambEx wants to hear the entrants' vision on how to connect the Australian sheep and lamb industry with city consumers. LambEx Young Guns may be on-farm, working in agriculture or agribusiness, studying and/or passionate about a strong future for Australia's lamb and sheep industry with the ability to clearly and creatively address the pitch. Eligibility is limited to those aged 18 to 35 years. Competitors must prepare an entry of up to three minutes in length using any digital medium(s) to share their vision.

<https://www.facebook.com/LambExAU/>

KEYWORDS: Lamb, meat production, primary production, competition, community engagement

BeefEx / SmartBeef

BeefEx (held next in 2024) is a celebration and showcase of the feedlot sector. It involves networking opportunities and a program of featured speakers. It draws together feedlot operators and staff, nutritionists, veterinarians, regulators, service providers and others involved in the grain fed beef supply chain.

SmartBeef (last held in 2021) attracts delegates for a 'ground level' technically focused conference that incorporates both plenary and practical sessions (e.g., big data, consumer trends, markets, economics, production, finance and leadership).

Both conferences incorporate presentations including awards, medals and research competitions.

<https://www.beefex.com.au/>

<https://www.smartbeef.com.au/>

KEYWORDS: Beef, feedlot, networking, professional development

GRDC: Grains Research Update

The GRDC Grains Research Update events are for agronomists, consultants, researchers and growers to see and hear the latest in research, discuss with peers the application of new and relevant information pertinent to farming systems and to network with colleagues and industry representatives.

The GRDC Grains Research Updates continue as flagship extension platforms for the grains sector, delivering critical information for grain growers and advisers. The Updates deliver the latest outcomes arising from research, development and extension projects supported by investment from GRDC and research partners.

Updates are usually held in Adelaide in February over 2 Days and in rotation through some regional areas with a 1-day event.

<https://www.orm.com.au>

admin@orm.com.au

KEYWORDS: Events, agronomy, grain, growing enterprises, research, extension

SA Sheep Expo (Adelaide, 26-28 April 2023)

The SA Sheep Expo offers young people (aged 12-23) an opportunity to develop a greater understanding of the sheep industry, future career opportunities and to provide encouragement of the next generation within the industry. The Expo (held annually over 3 days) is designed for high school and tertiary students and young agricultural professionals. Both the wool and meat facets are represented with hands-on sessions, presentations and tutorials from leading industry experts.

Participants compete in their age groups with the major incentive being a study tour valued at \$3,000 for the winner of the Senior age bracket (18 to 23 years). There are also bursaries, sponsored learning experiences and scholarships on offer across all age groups. The 2023 SA Sheep Expo will be held from 26-28 April at the Adelaide Showground, Wayville, SA. Entries open in January 2023.

<https://www.sasheepexpo.com.au/>

KEYWORDS: 18 to 23 years, high school, sheep, students, practical, wool, meat, livestock, competition

SA Junior Heifer Expo (July, Adelaide)

Since 1985, the South Australian Junior Heifer Expo has hosted 4200 local, interstate and international entrants aged 8-24 years. This program aims to educate, inspire and connect future leaders of the beef industry. A large number of past participants have gone on to take up prominent and responsible positions within the beef industry and the community in general.

The major annual award at the Expo is a \$6500 Beef Industry Scholarship, which is awarded to the Senior Champion Herdsperson. Participants are required to have a heifer or steer. A supply network assists those who do not have immediate access to a suitable animal. Expo participants and their livestock are accommodated at the Adelaide Showground at Wayville.

The SA Junior Heifer Expo will be held from 17th-20 of July 2023 at the Adelaide Showgrounds.

<http://www.sajuniorheiferexpo.com.au/>

KEYWORDS: 8 to 24 years, high school, livestock, cattle, competition

Herefords Australia National Youth Expo

The Herefords Australia Youth Committee invites all young beef industry enthusiasts to attend the 2023 Herefords Australia National Youth Expo. The 2023 event will be held at the Parkes Showground from Thursday 6 to Sunday 9 July 2023.

This event has been designed to give young people the opportunity to build their knowledge and understanding of the beef industry, in a safe and welcoming environment. Activities will target all age groups and experience levels, with demonstrations ranging from halter making and knot tying to practical demonstrations on feed milling and nutrient conversions. There is a strong focus on ensuring that the demonstrations are age appropriate, and that practical skills and knowledge will be able to be taken away from the event.

For those that don't have access to a suitable Hereford animal, there will be loan heifers available. Simply select 'Loan Heifer required' in the entry form and leave the rest to us.

National Youth Expo Most Potential Cattle Breeder: This award will see the successful applicant receive a registered heifer donated by Sugarloaf Creek Herefords. This award is designed to help a new youth member start their own stud or improve their existing stud with new genetics. Judging of the award is made up of a written component and how the participant conducts themselves at the 2022 National Youth Expo. An interview maybe conducted at the Expo. Please note that if you are under 18 years of age then you must have parent or guardian consent.

How to apply: Please submit answers to the following questions by email to youth@herefordsaustralia.com.au

1. Describe your involvement within the Agricultural Industry. 2. What is the vision for your breeding program? 3. Where do you see the Hereford breed's position in the current beef Industry?

National Youth Expo Photo Competition: The competition will be held at the National Youth Expo. Photos will be displayed throughout the event and the winners announced at the awards presentation. Conditions of entry: Bring photos to the Expo (no need to submit photos ahead of time), a photo can only be entered in one class and photos are to be presented on black cardboard. Classes are as follows:

1. Hereford cattle and Youth
2. Herefords for all climates
3. Hereford animal portrait
4. Farm Life

Travel Scholarship: In a new initiative added in 2019 to the National Hereford Youth Expo, Herefords Australia Youth will provide financial support for a participating Herefords Australia Youth member seeking an educational travel experience (destination of their choice) to further develop their knowledge and understanding of the breed on a greater scale. This year two successful applicant will receive up to \$2,500 to embark on their nominated national educational trip AUS/NZ. Travel destination(s) and duration is to be chosen and nominated by the applicant. To be considered for the Herefords Australia Youth National Expo Travel scholarship, applications must be received by mail or email no later than 24 June 2023.

Associations & Networks

AgTech Meetups

The South Australian AgTech Meetup group brings together developers, farmers, ag students and other stakeholders in the Ag industry - to collaboratively look at opportunities and solutions for technology to help make agriculture more productive, profitable and sustainable.

The group organises Meetups in Adelaide at locations like Lot Fourteen and The Waite Campus, and also puts on AgTech road trips to regions such as the Riverland, Yorke Peninsula, The Northern Adelaide Plains, and in 2022 headed down on an overnight trip to the South East as well as visiting the Mid North and Fleurieu Peninsula.

<https://www.meetup.com/SA-Agritech-Meetup/>

KEYWORDS: Technology, meetups, road trips, regional travel

Grain Producers SA

Grain Producers SA (GPSA) is the peak industry body for South Australian grain producers.

GPSA is non-political and represents producers to government, the community and industry, including grain marketers, exporters, storage and handlers, researchers and farm input suppliers.

GPSA develops and implements policies and projects that promote the economic and environmental sustainability of South Australian grain growing businesses, advancing these initiatives through advocacy, leadership and industry development.

Our mission is to ensure a profitable and sustainable grains industry in South Australia, through advancing the interests of grain producers.

<https://grainproducerssa.com.au/>

KEYWORDS: Grain, policy, projects, advocacy, industry development, producers

Association for the Advancement of Animal Breeding and Genetics (AAABG)

The Association for the Advancement of Animal Breeding and Genetics is a professional organisation based in Australia and New Zealand for livestock scientists, breeders, educators, students and industry service providers. The major activity conducted by AAABG to achieve its objectives is an international conference held at approximately two year intervals.

The principal objectives of the association are to:

- promote scientific research on the genetics of animals,
- foster the application of genetics in animal production and
- develop communication among all those interested in the application of genetics to animal production.

<http://www.aaabg.org/aaabghome/>

KEYWORDS: Livestock, breeding, genetics, research, communication

SA Sheep Industry Fund (SIF)

The SA Sheep Industry Fund provides a range of benefits to South Australian sheep producers via the programs and projects it supports. The independent SIF Board comprises of six fund contributors and is responsible for deciding which projects should be supported, administering the associated project expenditure, contracts and reporting.

Current SA Sheep Industry Fund projects include:

- Animal health programs and Traceability through the NLIS
- Predator control & dog fence rebuild
- Advocacy and Industry Development

<https://livestocksa.org.au/industry-funds/sheep-industry-fund-sif>

EO@livestocksa.org.au

KEYWORDS: Sheep, projects, animal health, advocacy, training, industry development

SA Cattle Industry Fund (CIF)

The SA Cattle Industry Fund exists to support programs that contribute to a profitable and sustainable Cattle industry in South Australia. To support this goal, South Australia's cattle industry, through the Cattle Industry Fund Board, have identified the following investment priorities that are the basis for SA Cattle Industry Fund investment:

- Maintaining market access,
- Securing new markets,
- Efficient and sustainable production,
- Business management and skills development,
- Advocacy.

Free

Sign up to the free internet and text message-based program at **ifarmwell.com.au** today.

How to support someone who is having a tough time

- **Ask** them about **how they are** [managing] [coping] [sleeping] [feeling about...] [feeling since...] [handling...] to indicate that you care
- **Listen** carefully, patiently and calmly to what they say, respecting their feelings, thoughts and opinions, even if you do not agree with them
- **Allow them to express** their feelings and thoughts (even if it makes you feel uncomfortable) but don't force them to do so
- **Allow pauses** or silence to let them think or gather their thoughts
- If they are very distressed, encourage them to take a few slow, **deep breaths** and do it with them
- Ask them about **what they are already doing** to help themselves manage
- **Praise them** for things they are doing that are likely to be helpful (e.g. exercising, speaking to friends and family, healthy eating, taking a break, listening to music, taking deep breaths, cutting back on alcohol)
- Ask them if they have **considered using a support service or program** – you might suggest ifarmwell – it is free and available 24/7
- **Tell them a 'good news story'** about someone who has used a particular service/program and found that it helped
- **Ask if there is anything you could do to make it easier for them to use the service/program** (e.g. help them find the phone number and make an appointment)
- **Don't put pressure on yourself to solve their problems** (listening to them and linking them in with other support people is enough)
- **Follow up at a later date** to indicate that you care and that they did the right thing by speaking to you

Look after yourself in the process of helping others

ifarmwell

Get the most out of everyday with ifarmwell. ifarmwell is a free, farmer-focused program which has been designed by Australian farmers to help other Australian farmers cope effectively with life's challenges and get the most out of every day. The website has been popular with farmers since its launch in 2018 because it speaks to them in a way they can understand and offers up practical tools and strategies which can be built into their everyday lives.

Ag Excellence Alliance (Ag Ex)

Ag Ex plays an integral role in providing leadership and encouragement to South Australian grower groups to engage and partner with each other as an influential network. The collective strength of the groups is paramount to ensuring the sustainability of farm businesses and ultimately as a driving force for practice change within the broader agriculture industry. Ag Ex continues to play its role within the development and extension space by working closely with groups on a number of collaborative projects. Ag Ex has been engaged by the SA Drought Resilience Adoption and Innovation Hub <https://sadrroughthub.com.au> to provide key positions in the Hub to interact with and support the grower group network.

The Knowledge Broker: facilitates new relationships and networks, as well as builds on existing networks for engagement and transfer of knowledge. They work closely with the five Node coordinators and the Ag Ex grower group network to identify and develop projects that lead to increased drought resilience. For further information contact Tony Randall tony@agex.org.au.

The Adoption Officer – Farming Systems: facilitates the development of relationships and networks that address the integration of livestock and grains production in mixed broadacre farming. Focussing on how farming systems are evolving across SA with the aim of driving innovation and adoption of new practices and products to increase resilience to drought. For further information contact Rachel May rachel@agex.org.au.

The Regional Agricultural Landcare Facilitator: supports grower group networks in the Northern and Yorke Landscapes region with a focus on the integration of environmental and productivity outcomes. Significant projects supported by the RALF include:

- The SA Carbon Footprint and Feasibility Extension Project seeks to build the competency and capacity of landholders to understand their carbon footprint and the feasibility of actions and practices required to achieve carbon neutrality.
- The National EcoVineyards Program will demonstrate ways to create and maintain functional agroecosystems and enhance ecosystem services within Australian vineyards.

KEYWORDS: Primary production, advocacy, policy, representation

Roseworthy Old Collegians Association (ROCA)

ROCA is the oldest of the Adelaide University Alumni groups, having been formed 125 years ago as the organisation representing graduates and former staff of Roseworthy Agricultural College. ROCA provides the vital link between Old Collegians, the University of Adelaide and the Campus administration.

ROCA is one of the largest and most enthusiastic groups within the University of Adelaide's Alumni Network and the organisations focus is Roseworthy Campus with its efforts supporting students through prizes, scholarships and bursaries. The association provides an ongoing bond for the many people who have been associated with Roseworthy Campus, providing a social and professional network and membership is free to eligible Roseworthy graduates and former Roseworthy based staff.

<https://www.adelaide.edu.au/roca/>

KEYWORDS: Social, networking, support, Roseworthy

Sheep Producers Australia: The Leadership Network

The Sheep Producers Australia (SPA) Leadership Network is a national network that connects sheep producers and people working in the industry who share the goals of driving industry growth and success.

The Leadership network:

- Provides value for the industry through accelerated development of current and future leaders.
- Assists in the development of forward-thinking strategic leaders.
- Provides value for individuals through personal and professional growth.

Training and professional development through SPA's Leadership Programs enables participants to understand pathways into leadership roles within SPA and the wider industry.

KEYWORDS: Training, professional development, sheep production, leadership

Grasslands Society of Southern Australia (GSSA)

GSSA was established in 1959 and has a network of eight branches across Southern Australia and welcomes new members with an interest in grassland farming. The GSSA aims to be the industry leader in information exchange, and to facilitate on-farm research and adoption to increase the profitability and sustainability of pasture systems in southern temperate Australia.

Four editions of the GSSA Newsletter are produced annually and contain articles on grassland topics, research updates, notices of coming events and branch reports. The society also holds an annual conference (no details currently available) with topics covering all grazing industries. GSSA, through its local branches, holds a number of field days and events for members as well as non-members.

<https://www.grasslands.org.au/>

The Crop Science Society of South Australia Incorporated is an active organisation of farmers, agribusiness consultants and agricultural research scientists.

The Society host monthly technical forums that feature some of the nations leading researchers as they discuss topical issues arising in academic and applied fields of crop production.

The Society also publishes a monthly newsletter that enables members to access research advancements surrounding contemporary issues.

Membership for students is free.

For membership details, visit:

<https://www.cropsciencesocietysa.com.au/memberships/>

Follow us

@cropssa

Crop Science Society SA

Crop Science Society of South Australia (CSSSA)

The CSSSA is an active organisation of farmers, farming consultants and agricultural research scientists, that was established in 1975. It was needed to provide a forum for the exchange of information between people in academic and applied fields; between research, teaching, extension workers, farmer's and marketing representatives – in fact all who have an interest in crops and crop production. The CSSSA provides a forum for the interchange of ideas from a membership extended beyond that spanned by any existing organisation. Currently, the society has approximately 450 members from rural and metropolitan SA, as well as a small interstate membership. Meetings are held on the third or fourth Wednesday of the month at Roseworthy.

The CSSSA have established three awards to recognise and encourage participation in the crop science community and further research by students and professionals, ie. the Tony Rathjen Student Contribution, the Duncan Correll travel bursary, and the John Both Award for excellence in in-field crop research.

Membership is open to any person or company engaged in the production / study of crop plants or weeds. Student membership is free.

Dairysafe

The Dairy Authority of South Australia (trading as Dairysafe) is the legislative body that oversees the production of all dairy products in the State. The role of Dairysafe is to ensure that South Australian dairy products are safe for consumers by ensuring they are produced by an accredited business operating in accordance with an approved food safety arrangement that specifies compliance with Australia's food safety standards at each point in the production process.

Dairysafe achieve this by applying the Food Safety Australia New Zealand (FSANZ) food standards at each point of the dairy production process. Dairy farmers, transporters of raw milk and processors of milk products are all required to be accredited with Dairysafe and undergo regular auditing to ensure compliance with the standards.

Agriculture Opportunities: Facebook Group

Founded by Professor Wayne Pitchford, the Agriculture Opportunities Facebook Group began following increasing requests from people wanting to find a connection between students and employers and was created to help place graduates into employment or scholarship positions. This group began with people who had undertaken the Professors' course but has rapidly grown to over 4,400 members.

Employment opportunities are frequently listed and past students actively use the group as well as recruitment companies. The group is moderated to remove posts that are not for employment or scholarship opportunities. There are employment opportunities at many levels and these positions can serve as an inspiration for High School students considering careers in Agriculture.

Angaston Agricultural Bureau

Angaston is part of a network 60 branches across South Australia. Groups meeting regularly to exchange ideas, discuss farming practices and issues and work on common challenges together and help to bridge the gap between scientist and farmer. It is a not-for-profit organisation run by farmers for farmers. The member base is as diverse as the program, with participants involved in vineyards, cropping, meat and wool sheep, beef and dairy cattle, fresh and dried fruit production, transport and contracting services and agribusiness. Visitors are always welcomed at Angaston / any branches meetings.

Angaston has a recognised reputation of supporting high school and University students, young early career professionals and Next Generation's career development via such major projects as;

- Attendance, travel Bursaries and training for the SA Sheep Expo and Merino SA Wether Challenge.
- Offering work experience to keen High School and University students.
- Various mentoring programs and training course and Industry Conference 's bursaries.
- Hosting groups / bus-loads of students from the University of Adelaide.
- Travel bursaries to attend Industry Conferences such as LambEx and State Landcare Conference.

A few years ago, fundraising contributed to having the branch's centenary sculpture 'Day Off, Peter' recast in bronze, 1888-1988. Located in the park in the main street of Angaston, it provides daily awareness to visitors of the contribution made by working horses and the Agricultural Bureau movement to the development of the country. It's a much loved and photographed icon of the area, go look next time you're in the Barossa.
